COPELAND BOROUGH COUNCIL

2006/07 BUDGET

REVENUE RECURRING GROWTH BID

Budget Heading:	Tenet MapRite
Portfolio Holder:	Cllr. Norman Williams
Manager:	Martin Jepson
Designation:	Head of Legal and Democratic Services
Item:	Tenet MapRite

Description: A product that will be a significant help in automatically adjusting our spatial data to reflect the Positional Accuracy Improvement (PAI) programme being carried out by the Ordnance Survey.

Estimated Cost:

	<-------------Memorandum Item Only-------------------->	
2006/07 £	**2007/08** £	**2008/09** £
10000	2500	2500

How does this fit in with Copeland's Corporate Plan?

By correcting our data in line with the Corporate GIS Strategy recommendations; Objectives and Priorities of the Copeland Corporate Plan will not be compromised and Gershon Efficiency Savings should still be attained.

What are the implications of not supporting this bid?

Our spatial data will not match or line up with the underlying Ordnance Survey data. This has potential legal implications especially around automated Land Charge searches. The spatial data will be very difficult to interpret because of this mismatch and make it impossible to work with. Essentially all of our spatial data will be unusable once we have received the updated base mapping from Ordnance Survey if this problem is not addressed.

Please provide evidence to support this bid

The Corporate GIS Strategy outlines ways of dealing with and handling PAI problems. This is a national problem that effects the country's 1:2500 scale mapping. This software comes highly recommended by our neighbouring local authorities who are currently and successfully dealing with this problem.
