

Notice of Motion from Councillor Brian Dixon

This Council views with concern the shortage of opportunity afforded to university graduates post graduation regarding employment suited to the course they have studied. In effect few employers require the subjects students have graduated in our Borough has distinct employment requirements relating to Energy and the schools and colleges curriculum should have greater emphasis on engineering- relevant business studies and energy related technologies.

The Council asks that Cumbria County Council to liaise as early as possible with higher education establishments to provide bespoke courses which will equip our young people for our Energy Coast job opportunities.

Councillor Brian Dixon
