

Who do I contact about sewerage issues?

Please report any problems with the sewer network to United Utilities on 0845 706 2200

[United Utilities](#) [1] are the first point of contact about sewer problems. You will need to look after your own drains but once they connect with drains from another property they will be looked after by United Utilities. They maintain sewer pipes that are shared by more than one property or that run beyond your property boundary (apart from in a few cases where these sewers are privately owned). You can find out whether they look after your sewer on their [sewers and drains explained](#) [2] page. .
