1. Introduction

The Strategic Housing Land Availability Assessment (SHLAA) is a key part of the evidence base supporting the Local Plan (or Local Development Framework).

The Copeland SHLAA serves two primary purposes. These are:

- To support the Core Strategy by demonstrating how the housing requirement identified in the Core Strategy could be delivered
- To provide the starting point for identifying housing sites when the Council produces the **Site Allocations Plan** (a Development Plan Document or DPD), which will complete the Local Plan.

Please note

This SHLAA is not an allocations document.
It **does not** allocate sites for development.

The allocation process will follow finalisation of the SHLAA. Inclusion of a site in the SHLAA list (Appendices 1-3) means that the site is considered suitable in principle for development. Conversely, it may be possible for a discounted site (Appendix 4) to be allocated for development if the reasons for discounting it are shown to be no longer valid.

The SHLAA constitutes a list of sites which may be suitable, within the terms of this exercise, to be developed for housing; the Site Allocation DPD will allocate land for development according to a wider range of factors. These include the newly adopted policy framework of the Core Strategy, a more detailed examination of environmental factors, and a consideration of which sites are best brought forward in the next fifteen years.

Thus, the SHLAA does not in any way prejudice decisions to be taken by the Council in relation to the Site Allocations Plan or the determinations of planning applications.

Structure of This Report

The report is split into sections as follows:

- A description of the methodology used to produce the SHLAA, including the viability assessment that was undertaken on each of the sites
- A broad outline of the housing requirements identified in the Core Strategy
- The assessment of the SHLAA sites, which identifies the number of dwellings that could potentially be deliverable on the SHLAA sites
- Maps of each settlement showing the sites mentioned in the report.

Responding to this report

Comments are invited and should be submitted by **Friday September 6.**

Write to

Planning Policy Unit

Telephone: **01946 598439**

Copeland Borough Council

Email: **ldf@copeland.gov.uk**

It would greatly aid the process if you could use the Representation Form at the back of this document (and also accessible on the Council's web site). Additional forms are available from the Council's Planning Policy team or from the website.

We may not be able to take fully into account comments that are not in writing or on the representation form, because we need to have responders' contact information from the form.

We will generally not acknowledge representations made by letter; however, email correspondence should receive an automated reply - if you do not receive this please contact Planning Policy on 01946 598439.

If you require a copy of this document in an alternative format, for example, large print, Braille, audio cassette or an alternative language, please call 0845 054 8600.

What will happen next?

We will consider all comments made and discuss them with the SHLAA Working Group (see page 7).

Sites which have been included in the SHLAA selection will form the basis for discussing which sites should be formally allocated in the Local Plan (Site Allocation document). This will be subject to a statutory consultation process beginning early in 2014. In that process the Council will also consider any proposals made to include for consideration sites which have been discounted in the SHLAA process.

2. Methodology

In the summer of 2008 Copeland Borough Council and Allerdale Borough Council took the decision to produce a joint methodology for their Strategic Housing Availability Assessment. This was intended as a means to help ensure a degree of consistency across both boroughs as well as speed up the process for both Councils at certain points of SHLAA production, though it was accepted that both would produce their own final SHLAA documents.

The methodology was produced in accordance with Planning Policy Statement 3: Housing (PPS3) (CLG 2007) and the 'Strategic Housing Land Availability Assessments: Practice Guidance' note published by the Department for Communities and Local Government (CLG July 2007)¹. It was consulted upon and approved by stakeholders in late September 2008. Copies of the approved methodology are available on the Council's website www.copeland.gov.uk.

A brief summary of the steps taken is outlined below.

Area Covered by the SHLAA

The SHLAA covers the same area as the Copeland Local Development Framework (i.e. all of Copeland that lies outside the Lake District National Park).

The focus when searching for sites was within and adjacent to the settlement boundaries in the Local Plan 2001-16 (adopted 2006). However, some of the sites that were submitted were within or adjacent to settlements that do not have settlement boundaries as they are not identified as a Key Service centre or Local Centre. Some sites were also poorly related to any settlement.

Identifying Sites

The Council initially started work on the SHLAA in 2008. Officers undertook a wide ranging desktop survey, drawing on numerous land use sources to identify **ALL** possible sites with housing potential. These included:

- Suitable sites that are still undeveloped from previous Urban Potential studies
- Potential site in the NLUD database
- Surplus Employment Sector Land where there is no developer interest
- Other desktop search through OS mapping and aerial photography
- Previous submitted requests received since the last Local Plan was adopted; either as new sites or settlement boundary extensions.

¹ Note that, although PPS3 has been discontinued, the practice guidance is still in force.

In addition to this desktop work the Council also issued a 'Call for Sites' requesting the submission of potential housing sites from landowners and property professionals on three separate occasions. These were:

- Initial Call for Sites (Autumn 2008)
- A Call for Sites to accompany the LDF Issues and Options consultation (Summer 2009)
- A Final Call for Sites (Spring 2011)

These methods of search identified approximately 300 potential sites in the borough outside the National Park for assessment.

Assessing Site Suitability

A number of information sources were used to assess the suitability of the sites. These included:

- Strategic Flood Risk Assessment (2007)
- Copeland Open Space Assessment (2011)
- Copeland Local Plan (2006) for planning constraints
- Cumbria Biodiversity Database

In addition to this the following organisations were consulted to gain an understanding around infrastructure constraints and other issues that may affect the suitability of a particular site:

- United Utilities (gas/water/electric/sewage constraints)
- Cumbria Highways (access/highway capacity)
- Environment Agency (Flooding Issues)
- Natural England (Biodiversity/Landscape Issues)
- English Heritage (Historic environment constraints)
- Copeland Contaminated Land Officer (Contamination/Mining constraints)

The Council's Development Management team also visited and provided an assessment of each site, giving details of the site's topography, any vegetation and/or buildings on site, surrounding uses, potential landscape impact, access considerations, current use, and planning history. They also provided information on any major, on-site constraints which may not have been picked up by the initial desktop identification.

Once all of this information was compiled it was considered to give an initial assessment of each site's suitability.

Discounting Sites: First Sieve

A range of criteria were used to perform the First Sieve of sites, discounting those sites which were wholly unsuitable for housing development. Sites have been discounted if:

- The site is currently within beneficial use
- The scale of the site is significantly too large to practically fit within A village/town (though allowance could be made for using a limited area of such sites)
- The site is far removed from any established settlement
- The site is within Flood Zone 3b (sites within Flood Zone 3a have also been discounted, except where they are a town centre regeneration site and may be acceptable through appropriate design)
- Cumbria Highways identified significant access/highway capacity issues
- The site has already been developed
- The site is severely constrained by utility concerns—such as excessive maintenance strips, power lines, sewage works or treatment plans
- The site is below 0.1ha in size (although such sites may still be appropriate for housing and are discussed later in the document)
- The site is within a Site of Special Scientific Interest, Special Protection Area, Special Area for Conservation or Ramsar site
- The site would have a detrimental impact upon a listed building/Scheduled Ancient Monument or protected landscape
- The site has unsuitable topography or is otherwise considered totally inappropriate by Development Management planners

The First Sieve reduced the number of sites to approximately 180.

Assessing Site Availability

The remaining sites that had not been discounted during the First Sieve were then evaluated for their availability. This was to determine whether the owner of a site would be willing to allow it to be developed as housing in the future. A site could not be considered to be deliverable if there was resistance to its development or there were other ownership complications (e.g. multiple ownerships) at this stage.

For this stage the Council assumed that any site should be considered available if it had been submitted to the Council (either in advance of the SHLAA process or via one of the three Calls for Sites).

Confirmation of the site's availability was required for those sites that the Council had identified from the desktop survey. To do this the Council contacted the Land Registry to establish ownership information for each site and then contacted those owners in turn to see whether or not they would like their site to be considered for housing development in the future. Owners were asked to respond if they did not want their site to be included and it has therefore been assumed that sites are available unless we were informed to the contrary, or their ownership could not be established.

Sites were considered unavailable, and therefore discounted at this stage, if:

- The site is subject to multiple ownership strips
- The owner did not want the site to be considered for potential future development
- No ownership information was available for the site

Assessing Site Achievability

The final stage for the remaining sites was to determine the achievability of each site. This effectively considers the viability of the sites and the number of dwellings a site could deliver, together with phasing of delivery.

Density:

A density of 30 dwellings per hectare has been used across all sites, except where specific factors (e.g. a current planning permission) provide an alternative figure. Whilst this only provides a relatively crude figure it is reasonable based on the density norm in the Core Strategy (of 30 dwellings per hectare) and is sufficient to demonstrate the delivery of the Core Strategy.

A more detailed and specific consideration of housing density and yield for individual sites will take place when the Site Allocations DPD is produced.

Viability:

During 2011 GVA Grimley Ltd undertook a viability assessment of the SHLAA sites as part of a piece of work to support the West Cumbria Economic Blueprint, building upon earlier work by Nathaniel Lichfield and Partners. This sought to provide a model that would assess the viability of all of the sites (based on land values, market attractiveness, site type and constraints etc.) to see whether sites would provide a developer with a profit and make them attractive to the market.

Part of the work considered what, if any, developer contributions (e.g. affordable housing or open space) could be sought from development, while another part of the assessment gave an indication of the deliverability of sites in different market conditions. The range of market conditions were:

- The current market (in 2011)
- A 10% uplift in the 2011 market values
- A 20% uplift in the 2011 market values

The results from the viability model, and especially the change in viability for sites in different market conditions, provided the basis for an initial differentiation between deliverable sites and those that would require an improvement in the market before they are likely to be developed.

The viability assessment suggests that very few sites are currently viable, but that with improved market conditions a significant proportion of the sites could be considered viable. There may also be the opportunity to require developer contributions on a large number of sites in an improved housing market.

The data was then amended where appropriate to reflect particular local circumstances (e.g. if it was known that a site was actually going to be delivered early).

The viability assessment report can be found on the Council's website www.copeland.gov.uk

Phasing of Delivery:

Some of the sites in the SHLAA are very large and are unlikely to be fully built out within the first five years (if identified as a Deliverable site). Therefore the following build out rates have been assumed:

- 40 units per annum in Whitehaven
- 20 units per annum in Cleator Moor, Egremont and Millom
- 10 units per annum in Local Centres

As a result, some of the sites identified as Deliverable in the first five years following adoption of the Core Strategy will have their provision split across the 0-5 and 6-15 timescales.

SHLAA Working Group

To ensure transparency throughout the SHLAA process, and as a way of seeking vital input from local developers and house builders, a 'working group' was set up to meet and discuss key elements of the process. The working group consisted of representatives from:

- Story Homes
- Persimmon Homes
- Thomas Armstrong
- Derwent & Solway Housing Association
- Impact Housing Association
- Home Housing
- Allerdale Valuation Officer

The working group has met to date for the Copeland SHLAA to:

- Agree the SHLAA methodology
- Agree economic viability modelling methods and discuss the 'first sieve'

Following consultation on this report, there will be a final meeting of the working group to agree the final list of SHLAA sites, which will be a major input to the Local Plan site allocation process.

3. The Housing Requirement

The Core Strategy identifies a housing target of 230 dwellings per annum with the flexibility to increase this figure to 300 dwellings per annum as required to support nuclear new build and the aspirations of the West Cumbria Economic Blueprint.

This suggests a baseline requirement of 3,450 dwellings, which may rise to approximately 4,150 dwellings, over the 15 years covered by the Core Strategy.

The Core Strategy also identifies how this development should be spread across different settlements. The distribution is as follows:

- Whitehaven – at least 45%
- Cleator Moor – at least 10%
- Egremont – at least 10%
- Millom – at least 10%
- Local Centres – not more than 20% (in combination)

This equates to the following dwelling requirements for each settlement that are outlined in Table 1.

Table 1: Dwelling Requirements by Settlement

Settlement	Core Strategy Target (230 p.a.)	Upper Target	% of Borough Total
Whitehaven	1,553	1,863	45%
Cleator Moor	345	414	10%
Egremont	345	414	10%
Millom	345	414	10%
Local Centres	690	828	20%
Additional KSC Windfalls/Rural Exceptions	173	207	5%
Total	3,450	4,140	

Paragraph 47 (bullet 2) of the National Planning Policy Framework states that *“Where there has been a record of persistent under delivery of housing, local planning authorities should increase the buffer to 20% (moved forward from later in the plan period) to provide a realistic prospect of achieving the planned supply and to ensure choice and competition in the market for land...”*.

In Copeland ‘under delivery’ is by the market, the land supply being adequate. Nonetheless, the Core Strategy assumes, based on analysis of the supply, that the five year supply should be large enough to include the required ‘buffer’ – in effect, six years’ supply should be readily available. Independent analysis of the SHLAA sites² indicates that this can be

² *Completing the Evidence Base – Viability Assessment Update*. (GVA 2011), available on the Borough Council web site.

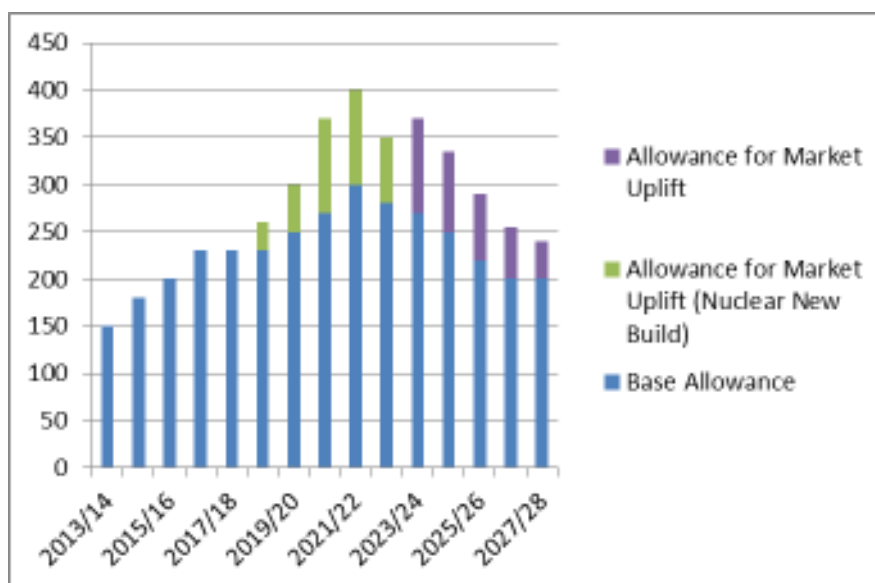

achieved with a margin to spare, though some aspects of ‘planning gain’ may have to be moderated in current economic conditions.

Table 2: Five Year Deliverable Requirement (including 20% Buffer)

Settlement	5 Year Requirement
Whitehaven	621
Cleator Moor	138
Egremont	138
Millom	138
Local Centres	276
Additional KSC Windfalls/Rural Exceptions	69
Total	1,380

It should be noted that there are a number of sites that are allocated in the Local Plan 2001-16 and/or already have planning permission, and these will contribute towards the delivery of the housing requirements. Therefore not all of the houses delivered by the Core Strategy will need to be provided via new allocations (which are likely to be identified in the SHLAA).

Appendix 5 in the submitted Core Strategy provides a housing trajectory that shows how the required level of housing is likely to be delivered: -

Based on expected emergence of developments in the nuclear sector, it is expected that demand, and thus house building, will peak in the early 2020s.

4. The Study Findings

Table 3 below demonstrates that the housing requirements in the Core Strategy can be delivered in broad terms. The figure of 6,336 would represent approximately 27 years worth of supply if 230 dwellings were built each year, or a 21 year supply at 300 per annum. This should allow a reasonable range of choices to be available, consistent with the Core Strategy, when the Site Allocations DPD is produced.

That said, there may be some settlements where further work is required when the Site Allocations DPD is produced. It is not currently an issue because there are a number of sites with planning permission that will also need to be taken into account when considering which SHLAA sites to allocate.

Table 3: Deliverable (0-5 Years) and Developable (6-15 Years) SHLAA Sites

	0-5 Years	6-15 Years	Total
Whitehaven	1080	1645	2725
Cleator Moor	136	479	615
Egremont	339	534	873
Millom	47	179	226
Local Centres	580	1309	1889
Smaller villages	66	81	147
Total	2248	4227	6475

It should be noted that in the short term delivery in Cleator Moor may be limited due to infrastructure capacity issues at the Cleator Wastewater Treatment Works. United Utilities state that planned maintenance work will address these issues and should be able to then accommodate the housing that has been identified for Cleator Moor in the Core Strategy. The upgrade of the treatment works is expected to proceed in 2013/14.

Table 3 demonstrates that the Local Centres collectively can provide the 5 year supply of deliverable sites, including the 20% buffer. However, when the Local Centres are considered separately it can be seen that some villages have more potentially deliverable and developable SHLAA sites than others.

Table 4 below shows the SHLAA sites for each of the Local Centres in turn.

Whilst not all settlements currently have sites identified as Deliverable or Developable in the SHLAA they may have a site(s) with planning permission that could deliver most, or all, of the housing needed. An example of this is Haverigg which currently has permission for approximately 90 dwellings.

Table 4: Deliverable (0-5 Years) and Developable (6-15 Years) Sites in the Local Centres

	0-5 Years	6-15 Years	Total

Seascale	88	43	131
St Bees	0	0	0
Thornhill	0	231	231
Total	600	1289	1889

Full details of all of the sites that are considered to be Deliverable and Developable can be found in Appendices 1 and 2 (with maps showing the sites in Appendix 5).

Brownfield/Greenfield Sites

When the split between greenfield and brownfield sites in the SHLAA is considered it can be seen that there are a number of brownfield sites within Copeland that could be developed, although most of them are only likely to be developable in the longer term. This is illustrated in Table 5 below.

Table 5: Brownfield/Greenfield Split

	0-5 Years	6-15 Years	Total
Brownfield	656	775	1431
Greenfield/Brownfield Mixed	300	746	1046
Greenfield	1292	2706	3998
Total	2248	4227	6475

Sites outside the Towns and Local Centres

Four sites were proposed outside of the four main towns and Local Centres villages that may be appropriate for housing development. Any such development would need to be for an identified affordable housing need and they will be given consideration when the Site Allocations DPD is produced.

Some of the sites may be too large for any identified need and as such only a proportion may be developed. It should be stressed that further work would be needed to determine the appropriate scale of affordable housing required, if indeed any is required.

Sites under 0.1 hectares

A number of sites that have been submitted to the Council to consider in the SHLAA are less than 0.1 hectares. Sites below this size are considered to be too small to be an allocation in the Local Development Framework and have therefore not been included in the SHLAA process.

Their exclusion does not mean that they will not be able or appropriate to deliver housing, and in some cases they may be useful as a source of windfall housing (as many are small brownfield urban sites) or rural exception housing (where they are adjacent to a settlement).

These sites could deliver approximately 70 dwellings based on a density of 30 dwellings per hectare, and perhaps more, as any actual density may be higher if they are developed.

Small sites such as these will help to contribute to the overall housing delivery in the borough. Any such site will need to be considered on its own merits if an application is submitted.

A list of these small sites can be found in Appendix 3.

Discounted Sites

All those sites that have been discounted following assessment in the SHLAA can be found in Appendix 4.

Next Steps – Site Allocations

The SHLAA does not allocate sites, but identifies a potential supply from which enough housing land can be drawn, and then allocated in the statutory planning process. Any housing allocations will thus be identified in the Site Allocations DPD.

Work on the Site Allocations DPD can begin in earnest once the Core Strategy has been adopted, which is expected to be in autumn 2013. (Preparatory work began in June 2013.)

Appendix 1 – Deliverable Sites (0-5 Years)

The following table lists the sites are considered to be deliverable (i.e. could meet the housing requirements for the borough for the first five years following Core Strategy adoption). They are grouped by settlement.

It should be noted that the two larger sites in Whitehaven will take much longer than five years to complete and therefore only a proportion of their overall capacity has been considered in the *deliverable* total. The remainder from each site is carried forward as developable capacity (but the sites have not been included in the table in Appendix 2).

In combination they could deliver approximately 2,050 dwellings.

Appendix 3 – Sites Under 0.1 Hectares

The following table shows the list of sites of less than 0.1 hectares that have been discounted from the SHLAA process due to their small size. Although discounted, these sites are in principle suitable for housing development.

Ref	Site	Street	Settlement	Area (ha)	Capacity	Density	Type
S165	Columba Club	Market Street	Cleator Moor	0.02	8	400	Brownfield

SR27	Land at Woodhouse Road	Woodhouse Road	Whitehaven	0.08	2	30	Greenfield

Appendix 4 – Discounted Sites

A number of sites that were proposed to the Council have been discounted from the process.

This may be for a number of reasons including:

- Flood risk
- Poor or no access
- The site is in the open countryside and not related to a settlement (i.e. is not in a sustainable location)
- The site is in beneficial use (e.g. open space/employment) or is allocated for another use (e.g. town centre regeneration site*)
- Landscape impact
- Some sites have been developed since originally being considered.

The following table lists all those sites that have been discounted together with the reason(s) for doing so.

* It should be noted that some residential development may be delivered within a town centre regeneration development, but it is not appropriate to consider such sites solely for housing. Therefore they have been discounted from the SHLAA process

Ref	Site	Street	Settlement	Area (ha)	Reason
CS28	Field 5264	Waterloo Terrace	Arlecdon	0.35	Outside settlement boundary Highly detrimental landscape impact Possible contamination
SR34	Arlecdon Parks Road	Arlecdon Parks Road	Arlecdon	1.11	Outside settlement boundary and poorly related to settlement
SR36	Off Braystones Road		Beckermest	1.59	Flood Risk - one third of site in Zone 3a. Potential access issues
CS27	Sour Close	Morass Road	Beckermest		Outside settlement boundary, open countryside
CS25	Western Extension	Jubilee Gardens	Bigrigg	2.48	Outside settlement boundary and would drastically alter settlement pattern. Highly detrimental landscape impact
CS80	Land at Croft Terrace	Croft Terrace	Cleator	0.14	Substandard access requiring land outwith the site to improve. Detrimental landscape impact (due to tree removal)
S032		Hilden Road	Cleator	0.6	Poor access (backland site) Flood risk - Zone 3a Highly detrimental landscape impact
S033		Main Street	Cleator	0.3	Poor access (backland site) Loss of community facilities; residents' car parking with recycling facility
SR15	Cleator		Cleator	8.05	Flood risk - part of the site in Zones 3a/3b. Highly detrimental landscape impact due to scale of site
CS77	Former Kangol Factory	Cleator Mills	Cleator	2.52	Flood zone 2/3a Adjoins SSSI
S031		Kangol	Cleator	3.80	Employment allocation in 2006 Local Plan Flood zone 3a Detrimental landscape impact (loss of open area within settlement)
S316	Ehen Bank	Palmer's Court	Cleator	0.10	No suitable access
S341	Adj Ennerdale Hotel	Main Street	Cleator	0.70	Access on bend potentially dangerous. Detrimental landscape impact.
CS05	Parkside	Parkside Road	Cleator Moor	0.14	Outside settlement boundary. In area of Parkside landfill.
CS31	North Millhill Farm	Whinney Hill	Cleator Moor	5.7	Outside settlement boundary and unrelated to settlement Flood risk - part Zone 3b.
S327	Former Allocation	Galemire	Cleator Moor	3.76	Outside settlement boundary.
CS69	Land Close to Existing Factory	Birks Road	Cleator Moor	0.17	Outside settlement boundary Detrimental to landscape? - trees with TPO on small site

Ref	Site	Street	Settlement	Area (ha)	Reason
CS74	Land at Aldry Place		Cleator Moor	14.5	Outside settlement boundary Highly detrimental to landscape No suitable access to a public highway.
CS81	Land off Trumpet Road	Trumpet road	Cleator Moor	4.01	Outside settlement boundary Detrimental to landscape The site is in a Tourism Opportunity Site.
S190	Rear Crossings Close	Rear Crossings Close	Cleator Moor	0.91	Poor access Potential sewer capacity issue Flood risk - part Zone 2
S191	Bowthorn Road	POS Bowthorn Rd	Cleator Moor	0.17	Flood risk – part in Zone 3b
S192	Railway land	Bowthorn Road	Cleator Moor	0.97	Flood risk - Zone 3b.
S312	Adj 20 Threaplands	Threaplands	Cleator Moor	0.1	Open space by planning condition.
S328	Leconfield Extension	Leconfield St	Cleator Moor	6.2	Employment land Access only achievable through industrial estate and across cycle path. Flood risk - part Zone 3b.
SR04	Ennerdale View	Birks Road	Cleator Moor	3.1	In existing use garden nursery Outside settlement boundary Possible access problems (not confirmed)
SR08B	Frizington Road East		Cleator Moor	3.1	<i>Outside settlement boundary and not well related to existing built form. It would have high visual impact.</i>
S315	Allotments	James St	Cleator Moor	0.18	<i>4 separate owners</i>
SR13A	Whinney Hill North	Whitehaven Rd	Cleator Moor	0.30	Outside settlement boundary Access.
SR13B	Whinney Hill South	Whitehaven Rd	Cleator Moor	0.17	Outside settlement boundary Access.
CS91	Adjacent to Coulderton Village		Coulderton	3.61	Site in open countryside and too large. Highway capacity issues.
CS100	Land at Howgate		Distington	1.16	Open countryside. Unrelated to settlement with services Detrimental landscape impact
CS101	Land at Howgate		Distington	2.1	Open countryside Unrelated to settlement with services Detrimental landscape impact

Ref	Site	Street	Settlement	Area (ha)	Reason
S138	Car Park British Legion	Distington	Distington	0.23	Existing use - car park. Possible access problems.
CS58	Adj Sandholes	Grove Road	Egremont	7.14	<i>Poor access. May be sewer capacity issues.</i>
S203	High Mill		Egremont	0.53	Flood risk - Zone 3a/part 3b.
S318	Council Depot	Chapel St	Egremont	0.26	Employment Opportunity Site Flood Zone 2.
S319		Beck Green	Egremont	0.15	Beneficial use – amenity open space Flood risk - Zone 2/3.
SR16	Land at Howbank Farm	Howbank	Egremont	1.72	Outside settlement boundary and poorly related to the built form Detrimental to landscape Access issues.
SR17	Land at Howbank Farm	Howbank	Egremont	6.08	Detrimental to landscape At best would be 6-15
SR21	Land at Howbank Farm	Howbank	Egremont	3.85	Outside settlement boundary and poorly related to the built form Flood Risk - Zone 3b Access issues.
SR22	Wyndham Terrace	Wyndam Terrace	Egremont	0.15	Access may be problematic Flood risk - Zones 2/3a Currently allotments.
S038	Bridge End	Bridge End	Egremont	0.40	Beneficial use (allotments) Access problems.
S199	Chapel Street Car Park	Chapel street	Egremont	0.39	Employment Opportunity Site
SR35	Land at Woodend	Near Egremont	Egremont		Not related to settlement Detrimental landscape impact Access difficult to resolve
	Unrecorded site at Gulley Flats		Egremont		In open country (though adjoins other sites in SHLAA supply)
CS39	South Park	Rheda	Frizington	10.98	Outside settlement boundary, not related to settlement Scale of site to great. Detrimental landscape impact
CS59	Workshop Site/Industrial Estate	Frizington Rd	Frizington	0.92	Loss of employment land.
S028	Allotment Site	Frizington Road,	Frizington	0.4	Site in beneficial use - allotments.

Ref	Site	Street	Settlement	Area (ha)	Reason
S346	Lingla Bank		Frizington	1.3	Completed development.
S124	Chapel Autos	Main St	Frizington	0.02	Completed development.
S127	Adj. 129 Main Street	Main St	Frizington	0.01	Completed development.
CS70	Land Close to Rheda Home Farm		Frizington	6.61	Not related to settlement No Access.
CS33	Beck Brow Farm		Haile	2.03	<i>Outside settlement boundary. Scale of site - may exceed WWTW capacity, would have significant visual impact, disproportionate to size of Haile.</i>
CS50	Adj Cricket Club		Haverigg	2.69	Outside settlement boundary Poor current access Flood risk - Zone 3a. .
S333	Allotments	Willowside	Haverigg	0.96	Access substandard Flood risk - Zone 3a.
CS75	Field No 2271	Low Moresby	Low Moresby	1.59	Access - potential gradient and visibility issues to overcome. Detrimental to landscape
CS82	Land at Low Moresby		Low Moresby	1.04	Poor access (backland site) Detrimental to landscape
CS83	Land at Low Moresby		Low Moresby	0.25	Access; no suitable access to a public highway (backland site) Detrimental to landscape
CS84	Land at Low Moresby		Low Moresby	0.3	Access problematic Detrimental to landscape
CS24	Former Hodgson Pit		Lowca		Outside settlement boundary, in open countryside. Detrimental landscape impact?
S022	Allotment Area	Solway Road,	Lowca	0.3	Site in beneficial use - private allotment gardens therefore ownership issues.
CS51	Adj Boundary Lane	Mainsgate Road	Millom	3.23	Loss of allocated employment land Flood risk - Zone 3a (tidal). Part of site outside settlement boundary. No clear suitable access.
S047	Adj Mainsgate Road Factory		Millom	2.2	Loss of allocated employment land. Flood risk - Zone 3a (tidal).
S069	Foundry Road Garage	King Street	Millom	0.77	In beneficial use - employment land Flood risk - part in Zone 3

Ref	Site	Street	Settlement	Area (ha)	Reason
S320	Back Bay View	Pannatt Hill	Millom	0.35	Poor access (landlocked?) Amenity green space.
S321	Adj Stella Terra	Holborn Hill	Millom	0.38	Poor access.
S332	Adj Marsh House	Devonshire Rd	Millom	0.29	Ecology (SSSI).
SR23	Crook Field	Devonshire Road	Millom	1.3	Flood risk – part in Zone 3a
S044	Rear of fire station	Millom Road	Millom	0.30	Beneficial use - allotments Flood Zone 3a.
S351	Former Ironworks	Devonshire Road	Millom	2.00	SSSI. Local Nature Reserve.
S086		Queen Street	Millom,	0.04	Completed development.
CS61	Scalegill Hall		Moor Row	1.52	Outside settlement boundary. Employment land allocation (Westlakes Science & Technology Park). Impact on Listed building.
CS85	Land Adjacent to Scalegill		Moor Row	9.78	Employment land allocation (Westlakes Science & Technology Park). Outside settlement boundary Detrimental to landscape Impact on Listed Building.
CS86	Land Adjacent Moor Row and Wes		Moor Row	0.66	Outside settlement boundary - open countryside. Detrimental to landscape
CS87	Land opposite St Johns Church		Moor Row	3.78	Outside settlement boundary and poorly related to settlement - open countryside Highly detrimental landscape impact
CS88	Land Adjacent to Shaw Farm		Moor Row	0.67	Outside settlement boundary and poorly related to settlement - open countryside Detrimental landscape impact
CS90	Land on Corner of A595 at Moor		Moor Row	2.2	Outside settlement boundary - open countryside. Detrimental to landscape
CS93	Land at Moor Row		Moor Row	1.65	Outside settlement boundary Highly detrimental to landscape No suitable access to public highway
CS65	Allotments	Rear Penzance St	Moor Row	3.90	Part of site is protected green space. Allotments Detrimental to landscape. Access problems.
CS47	Round Close Farm		Moresby Parks	9.8	Detrimental to landscape due to prominence and size of site Poor access

Ref	Site	Street	Settlement	Area (ha)	Reason
					Scale of site would have significant impacts.
CS62	Former Opencast Access	Scilly Banks	Moresby Parks	2.1	Outside settlement boundary Detrimental landscape impact
S324	Playground	Brewery Brow	Parton	0.59	Poor access. Would result in loss of community facility.
S350	Whites Row		Parton	0.40	Flood Zone 3a
S013		Parton Brow	Parton	4.5	Scale of site Ground conditions, topography. Part of site in Flood Zone 3a Possible access problems.
S041		Cross Lanes,	Seascale	0.7	Loss of employment land.
S103	Car Park	The Banks	Seascale	0.21	Existing use - car park for golf course.
S042		Rueberry Drive	Seascale	0.20	Part in Flood Zone 3a Access would need to be resolved
S102		Black How	Seascale	0.40	Access issues
S108		Rear Wansfell Hotel	Seascale	0.31	Access issues Detrimental to landscape
CS11		Nethertown Rd	St Bees	3.87	Outside settlement boundary Highly detrimental to landscape Poor access
S229B	Abbey Road		St Bees	0.35	Easement and landscape area for roadside approval on S229. Detrimental to landscape
S230	Seacote Car Park		St Bees	0.37	Existing use - car park Highly detrimental to setting
S325	Stonehouse Farm	Main St	St Bees	0.17	Detrimental to landscape Poor access (backland site) Impact on neighbouring properties.
S336	Rear Albert Hotel	Lonsdale Terrace	St Bees	0.2	Poor access (backland site) Impact on Listed Building.
S227	Rear Manx Horizon		St Bees	0.35	Outside settlement boundary Access (backland site)
CS99	Thornhill	37 Thorntree Drive	Thornhill	0.16	Access (backland site)

Ref	Site	Street	Settlement	Area (ha)	Reason
CS94	Harras Moor	Harras Dyke Farm	Whitehaven	0.19	Outside settlement boundary. Access.
CS97	Harras Moor	Harras Dyke Farm	Whitehaven	0.15	Outside settlement boundary. Access.
CS49	Brisco Bank Farm		Whitehaven	12.26	Topography and scale of site Highly detrimental to landscape.
CS10	Moresby Parks Rd	Hensingham	Whitehaven	0.58	Existing business on site. Surrounded by non-residential uses.
CS12	New Monkway	Hensingham	Whitehaven	9.25	Outside settlement boundary Detrimental to landscape owing to scale of site.
CS20	Laurel Bank	The Highlands	Whitehaven	1.6	Protected Open Space. NO APPRAISAL DOCUMENTATION
CS40	Adj Bay Vista	Victoria Road	Whitehaven	0.28	Impact on TPO and landscape. Poor visibility for access.
CS44	Play Area	Bay Vista Estate	Whitehaven	0.12	Site in beneficial use – amenity open space.
CS45	Alder Close	Rannerdale Drive	Whitehaven	0.09	Outside settlement boundary Poor access.

SHLAA Settlement Maps (deliverable/developable sites)

The maps on the following pages illustrate the SHLAA sites as they are located in the various towns and villages in the borough. Only those settlements containing deliverable or developable SHLAA sites have been included.

The sites have been colour coded to indicate when they are likely to come forward. The timescales are:

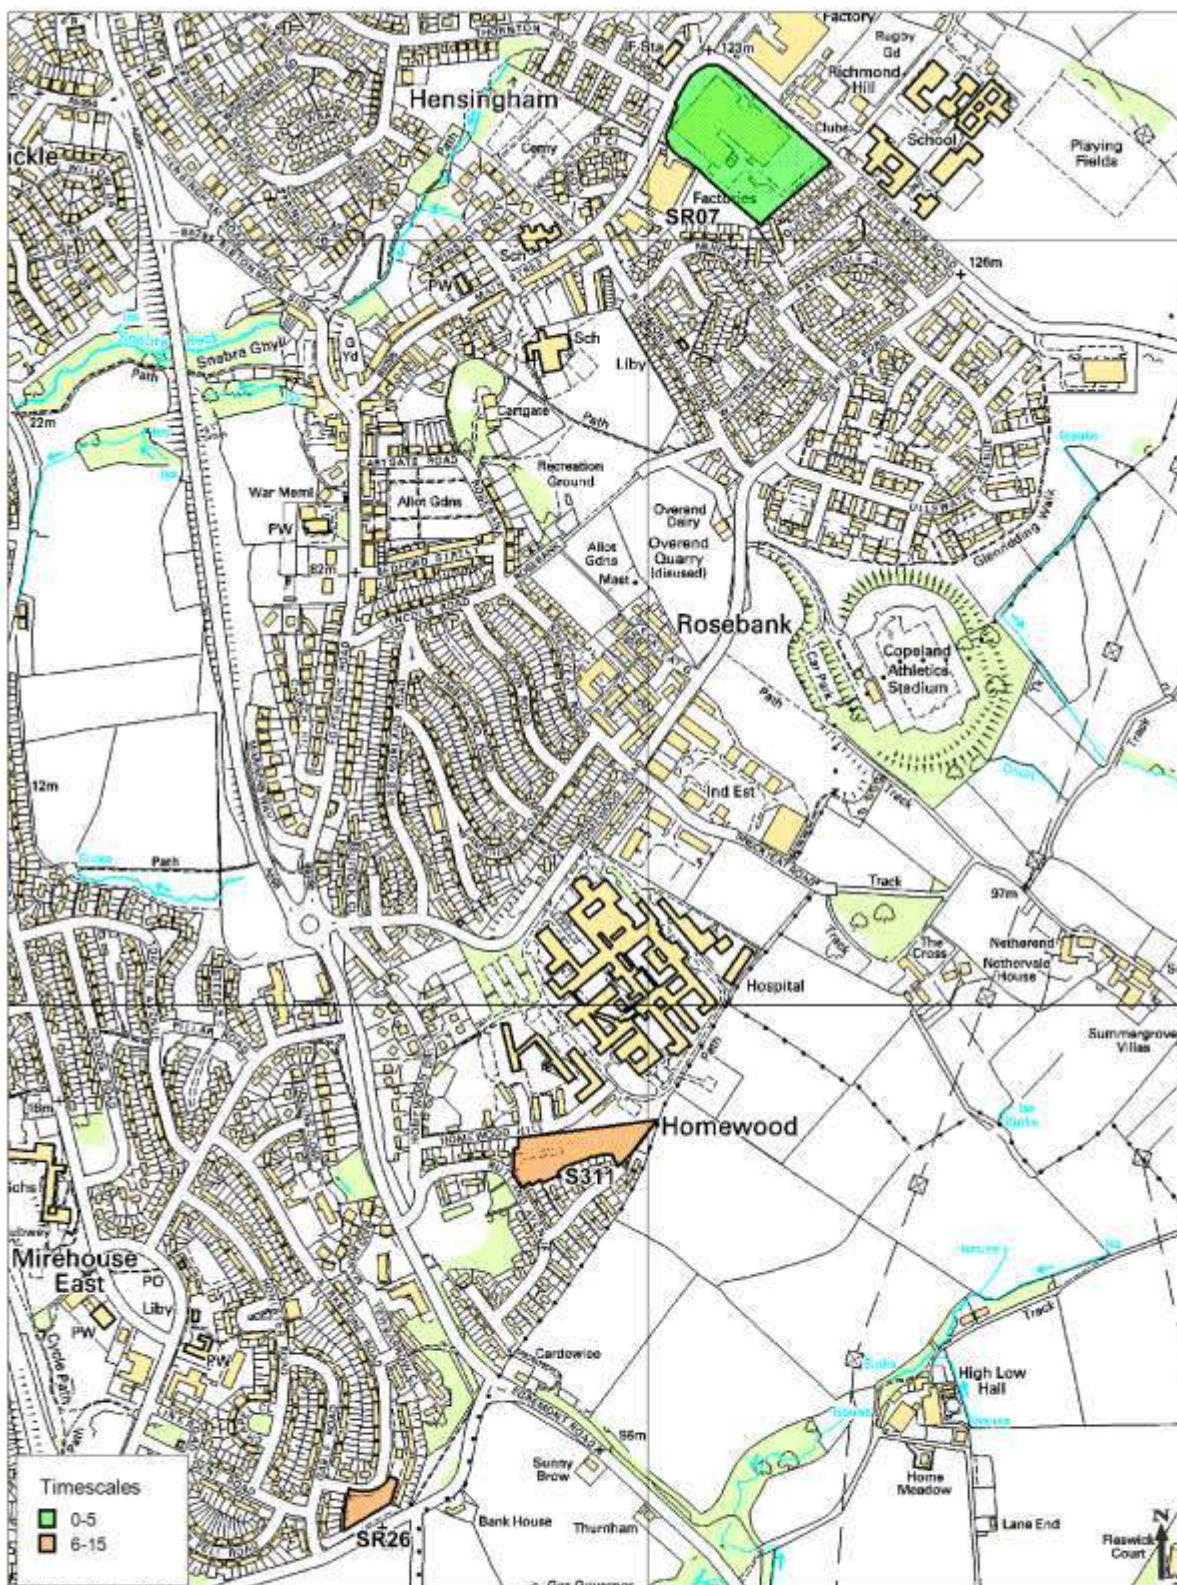

Deliverable (0-5 Years after adoption of the Core Strategy)

Developable (6-15 Years after adoption of the Core Strategy)

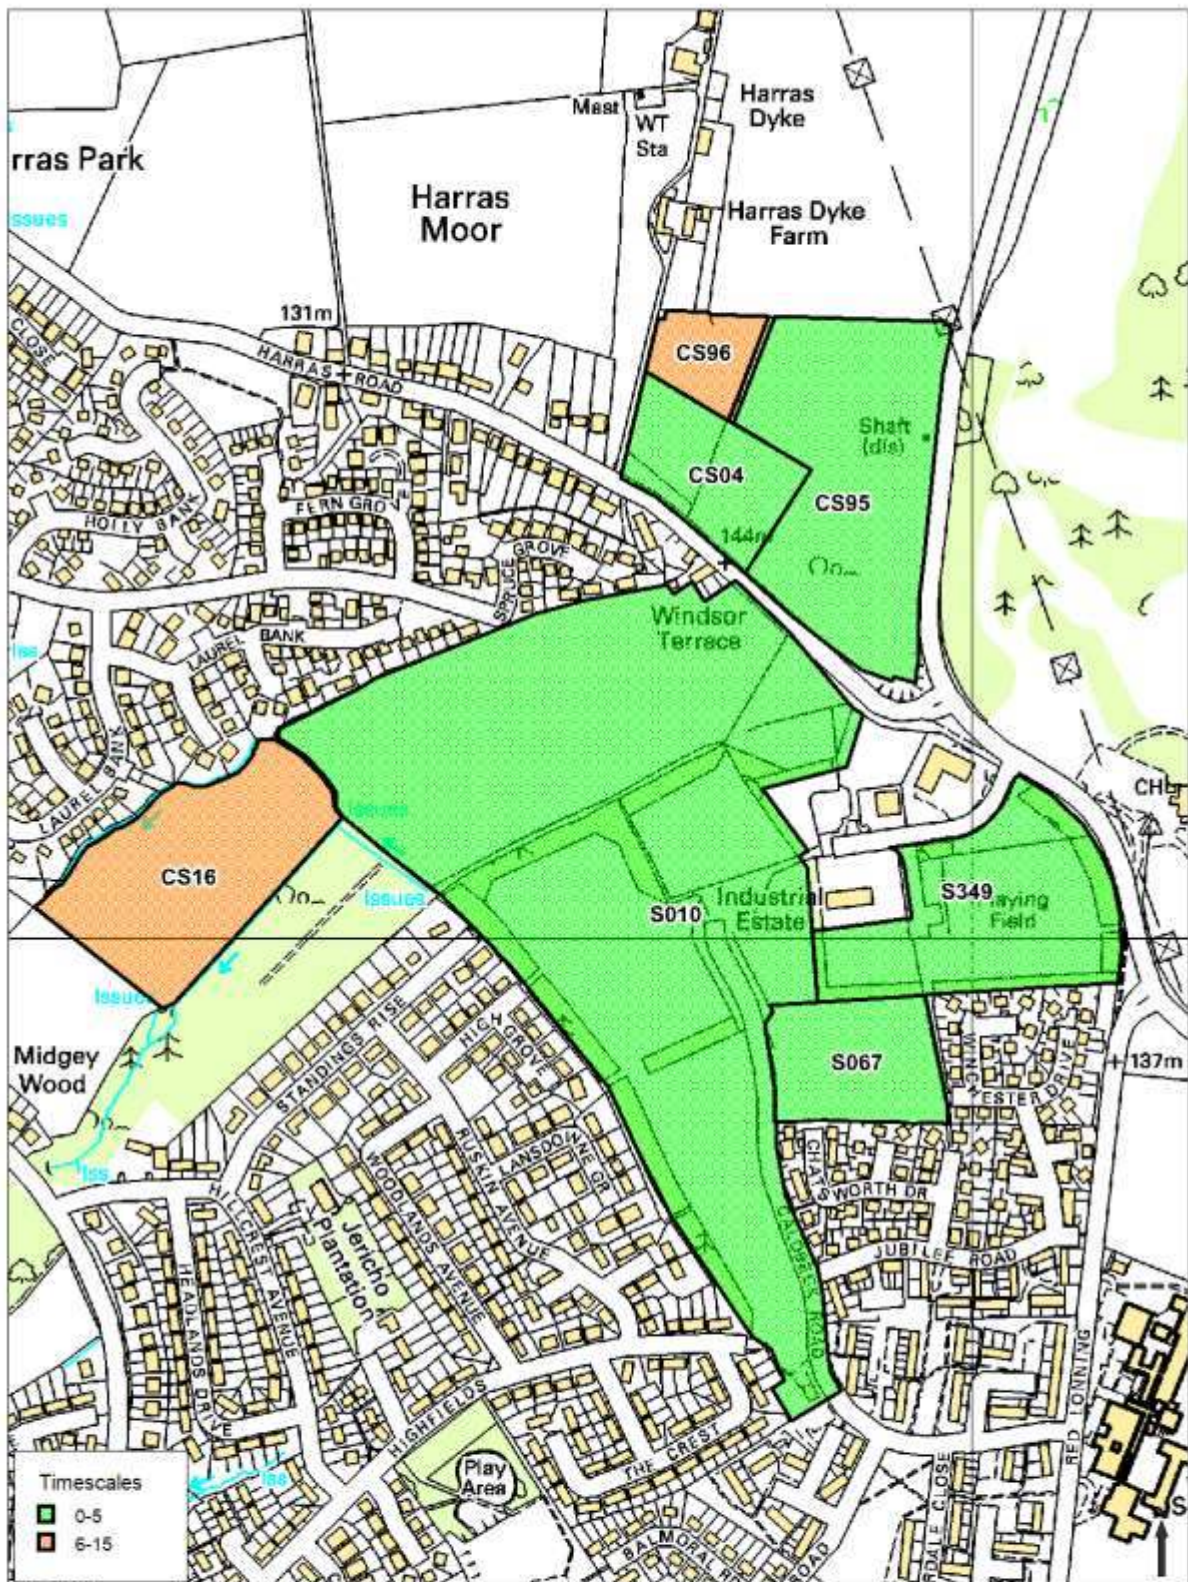

Maps showing the discounted sites have not been included in this report but are available to view on the Council's website www.copeland.gov.uk or on request by calling 0845 054 8600

SHLAA Settlement Maps (discounted sites)

The maps on the following pages illustrate the sites which have been 'discounted', that is, not included in consideration of the supply on the grounds of there being issues that make them ineligible, or at least problematic, on policy or technical grounds. As in Appendix 5, only those settlements containing such sites are shown.

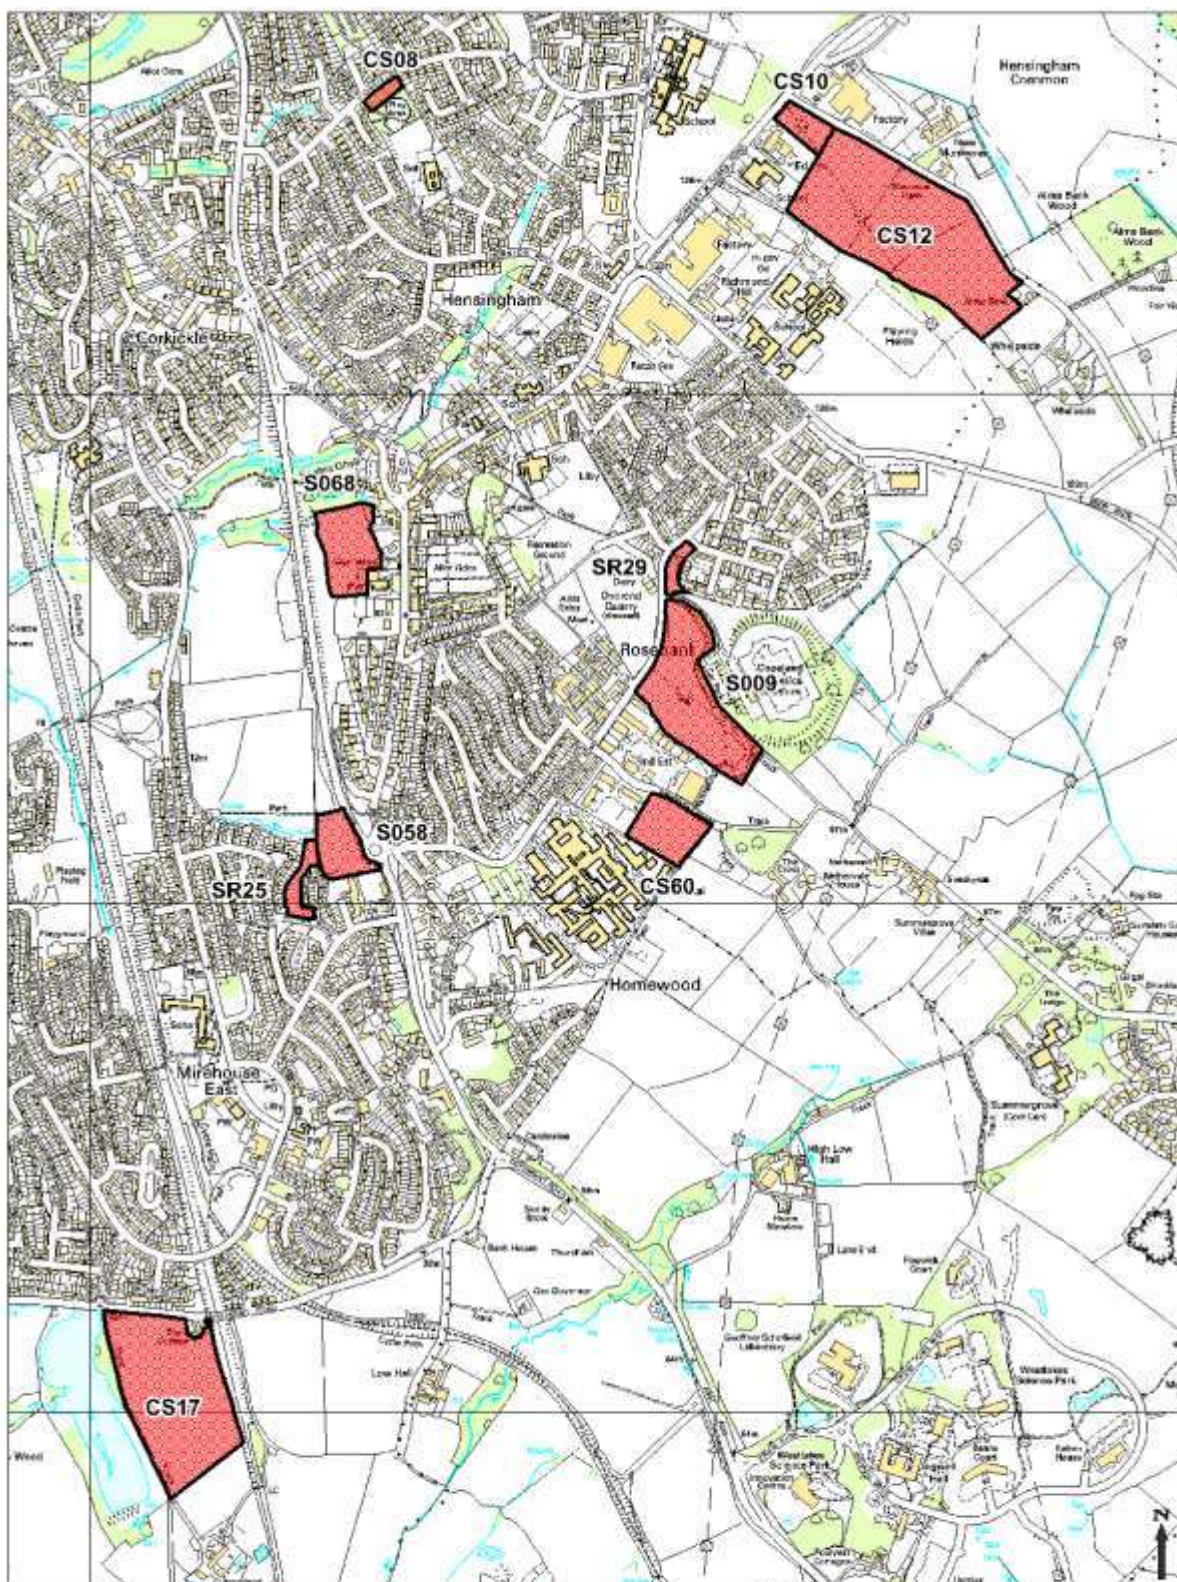

Date: 09/07/2013

Copeland SHLAA Discounted Sites 2013: Whitehaven West / South

Crown copyright & database rights (2011) Ordnance Survey (100019619).

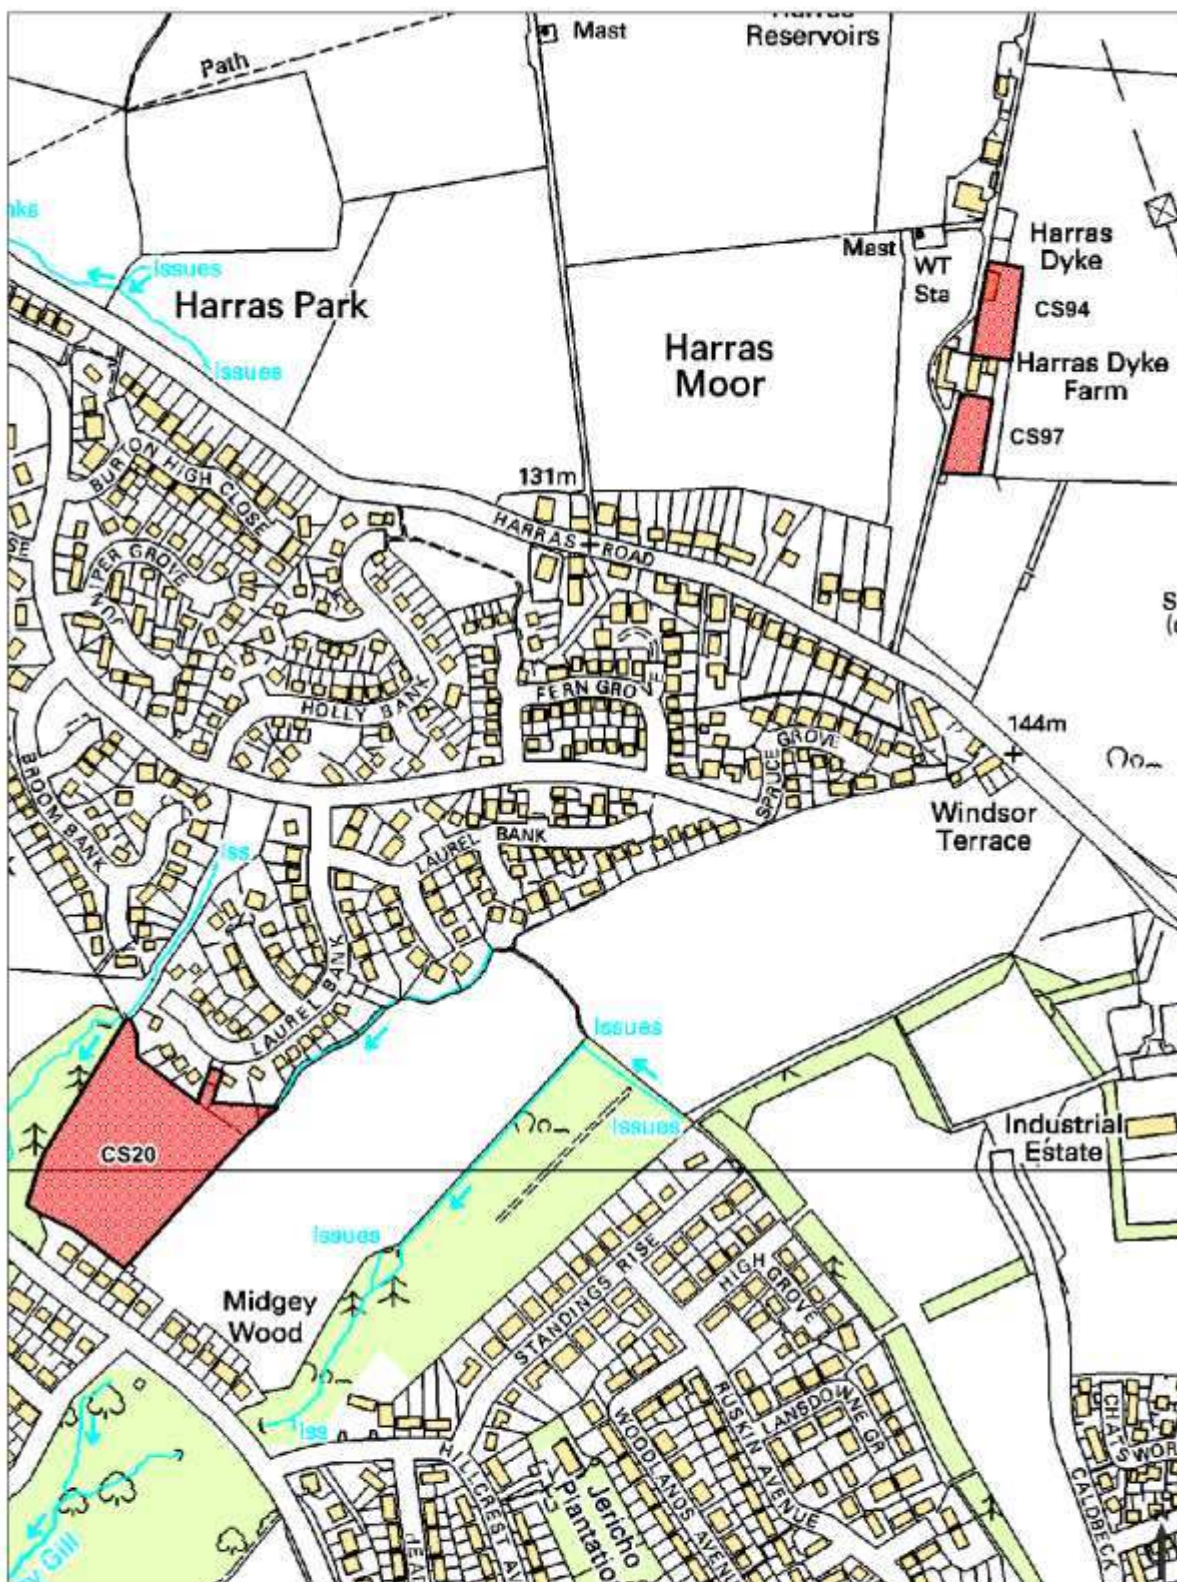

Date: 09/07/2013
