Response	Agency Responsibility	LOCAL AUTHORITY RESPONSIBILITY
<b>A</b>	<b>Refer incident to LA</b>	Remove waste if on public land; investigate possible offences
<b>B</b>	<b>Refer incident to LA:</b> Serve Duty of Care notice (where appropriate) if LA request it	Remove waste if on public land; investigate possible offences
<b>C</b>	<b>Refer incident to LA.</b> If LA discover evidence Agency has responsibility to investigate; inform LA of investigation outcome	Remove waste if on public land; pass evidence (if any) to Agency
<b>D</b>	<b>Investigate.</b> Inform LA to facilitate possible removal.	Remove waste if on public land; refer incident to Agency to facilitate investigation
<b>E</b>	<b>Agency emergency response. Investigate</b>	Refer incident to Agency (nothing should prevent a LA from acting to prevent/ameliorate harm to the public/pollution).
1	Where waste is deposited in water (excluding drains) with a risk of pollution / obstruction of the watercourse there will be a presumption that the Agency will arrange the removal of the waste unless it considers it inappropriate / unnecessary. Refer to LA if Agency declines to remove.	
2	When LA's discover / have reported to them fly-tipping incidents containing potentially hazardous wastes and it is reasonable for Local Authorities to ask for and receive advice on the disposal of this material. If the Agency considers that the incident would be categorised as a major/significant incident it will treat the fly-tipping incident as an E* and respond accordingly.	
*	The Agency should arrange for the waste to be removed.
