Item to be added to scrutiny agenda – Whitehaven Rugby League Club.

We the undersigned would like the following item to be placed on the agenda of the appropriate overview and scrutiny committee.

That the role of the two directors, the council placed on the management committee of Whitehaven Rugby league be reviewed, with specific reference to the following questions:

- Were the councillors who were appointed to the WRLC board given any appropriate training and support to perform this function?
- What was the reason for removing officers from this role and replacing them with councillors? Is there any reason to believe that their decisions contributed to financial loss suffered by the club or by the council?
- What reporting mechanisms existed for the councillors to report back any issues that were found during their time on the board?
- What reporting back to council took place? Was the council kept fully informed of all actions of the board? Is the reporting considered to have been adequate? If not why not, and what improvements can be put in place for the future.
- Did the council get all information that was requested from the representatives during this time?
- Has any evaluation been done on the performance of the council representatives, with a view to improving how the council handles these matters in the future?
- What was the total cost to the council of having the councillors on the Board of WRLC?

Kind regards

Alistair Norwood
