

Proposed member briefing session's in relation to the Nuclear New Build project at Moorside.

LEAD OFFICER: John Groves
REPORT AUTHOR: Denice Gallen

Summary and Recommendation:

Members will be aware that the Moorside project is now beginning to gain momentum; therefore the Council has requested that the developer NuGen Ltd hold a briefing session with all Members to appraise the Council of the key mile stones and progress on the project.

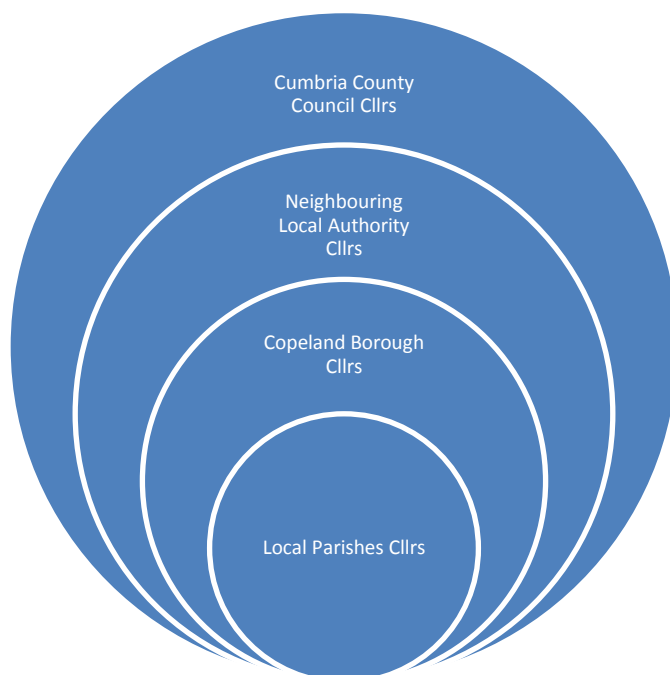

1. Overview

The Moorside project is currently being progressed and the developer is still aiming to submit a Development Consent Order (DCO) to the planning inspectorate in the first quarter of 2015.

As such the timescales for public consultations on the project will be happening in Q1 of 2015 with the second consultation in Q1 2016, therefore it is important that Members are kept fully informed so that they can appraise the public on the project.

The Council has requested a series of briefings as outlined below, we aim to hold the first of these pre-Christmas, we are currently trying to finalise dates and will update Members as soon as possible.

NSIP Members briefings
