| delivery rates have been provided by the developer) |

Introduction

- 1.1 The Housing Trajectory identifies how much housing is likely to be delivered in Copeland annually over the 2021-2038 plan period and on which sites. It also identifies how much housing is planned within each settlement and within which tier of the settlement hierarchy.
- 1.2 The document has a base date of 31st March 2022. This means that any planning permission granted, or any dwelling completed after this date will not be taken into account unless it relates to a site that had outline planning permission at the base date.
- 1.3 The trajectory considers the following types of sites:
 - (1) Allocations: Allocated housing sites within the emerging Local Plan.
 - (2) Extants 5 and Under: Sites with planning permission (full or reserved matters) for 5 dwellings or less¹.
 - (3) Extants Over 5: Sites with extant planning permission (full or reserved matters) for over 5 dwellings¹.

- (4) Outlines: Sites with extant outline planning permission for housing².
- (5) Windfalls: Sites that have not yet been specifically identified through the Local Plan process where housing will come forward over the plan period including those that fall under the size threshold for allocation. This includes larger sites that are currently subject of preapplication discussions and smaller sites, such as conversions etc.
- (6) Demolitions: An allowance has been made for future demolitions. Further information is included in Table 1 below.
- 1.4 The trajectory is based upon the latest estimates of delivery from developers where provided³. The estimates are non-binding and simply give an indication of when a development is likely to commence and how many homes will be built on site each year. Where this data is not available, assumptions have been made as set out below.

¹ Where a site has stalled and no activity has taken place for a number of years the site has not been included in the supply unless recent evidence suggests re-commencement is likely.

² In some cases, a site has an outline planning permission but individual plots have been sold on as self-build plots. Where a plot has a reserved matters or full application it is included in the Extants 5 and Under category and the number of units listed in the outlines table has been reduced accordingly.

³ Where such information is available this is indicated within the relevant table.

Assumptions

1.5 Where delivery timeframes haven't been provided by the developer the following assumptions have been applied. This is based upon the generic delivery assumptions set out in the Five year Housing Land Supply which have, in the main, been agreed by the development industry.

Table 1: Delivery Assumptions

| Development Start | Where development has commenced it has been assumed that completions will be delivered on site from year one unless evidence suggests development has stalled. |
|--------------------|--|
| | Where development has not yet started, but permission has been granted, completions are assumed to come forward in years 2 and 3 dependent upon whether the approval is outline or full/reserved matters, the complexity of any constraints/conditions, whether there is developer interest etc. |
| | Where a site is allocated but does not benefit from an extant permission, completions have been assumed from years 4 onwards. |
| Delivery Rates | A cautious approach has been taken and an assumed completion rate of 10 dwellings per year has been applied, unless delivery rates have been provided by the developer. This assumed rate is based upon the <i>lowest</i> of the delivery rates provided by developers across sites of 5 units or more. |
| Windfall allowance | The Five Year Land Supply Statement (HLS) provides compelling evidence to show that windfall developments have formed a significant part of the housing supply in previous years and will continue to do. |
| | An allowance has been made for 30 dwellings per year on small sites (5 and under). This is based on previous trends which show that on average 34 dwellings per annum have been delivered on such sites since 2013 ⁴ |
| | The projected figures have been reduced by 10% (from 34 to 30) to take into account garden sites as is common practice. A cautious approach has been taken and a windfall allowance is only included for years 3+ to avoid double counting as windfall developments that come forward in the earlier years are likely to already benefit from planning permission. |

⁴ Please see the Five-Year Housing Land Statement for more information regarding previous delivery on windfall sites

| | Previous trends show that 93 dwellings have been delivered on larger windfall sites on average each year since 2013 ⁵ . The Council is also aware of a number of larger sites (5 units+) that have gained planning permission or have been the subject of pre-application discussions post the trajectory base date of 1 st April 2022. No windfall allowance for larger sites has been included here however as developers are likely to be focussed on delivering the Local Plan allocations and completing sites that are already under construction. |
|--------------------------|---|
| | This approach differs to that taken in the Five Year Housing Land Supply Statement which includes a windfall allowance for larger sites instead of including housing allocations. |
| Housing Allocations | All housing allocations have been included in the trajectory and a number have received planning permission post the trajectory base date. Where delivery rates have been provided by the developer this has been noted. Where this information has not been available, or where the site does not benefit from planning permission, an assumption that 10 dwellings per year will be completed annually has been applied. The first completions are anticipated in years 4 or 5 of the plan period ⁶ depending on whether the site has planning permission or not at present. |
| Demolitions ⁷ | The HLS shows that since 1 st April 2013 there have been, on average, two homes demolished each year. This excludes demolitions ⁸ between 1 st April 2020 and 31 st March 2022 which were a result of a single housing market renewal development at Queens Park, Millom. There is no evidence to suggest this level of demolition will occur again over the plan period. |

⁵ It should be noted that the Council has not allocated any new housing sites since 2006.

⁶ Year 5 of the plan period relates to year 4 of the Five year supply period as each projects forward from a different date.

⁷ Please see the Five Year Housing Land Supply Statement for more information regarding demolition rates

⁸ 58 demolitions as part of the Queens Park redevelopment scheme in Millom, which will see a similar number of new homes replace them.

- 1.6 Table 2 shows that the Local Plan requirement over the plan period 2021-2038 of 2482 dwellings can be met comfortably, with the identified sources of sites providing up to 4368 dwellings. It also shows that the aspirational growth target of 3400 dwellings can also be met comfortably.
- 1.7 It must be noted however that, whilst all sites are considered to be deliverable, they may not all be delivered. Allocating over and above the highest target allows for flexibility and helps improve the range and choice of housing in the borough. The actual delivery rate will depend upon a number of factors including market forces and demand, wider economic signals and the progress with local projects affecting the growth scenarios, and capacity within the sector locally.

⁹ Figures for 21/22 are actual figures and the remainder are projections

¹⁰ Allocations in Local Plan 2021-2038 except for 21/22 which relates to allocations in the Core Strategy or 2001 Local Plan

¹¹ Sites of 5 units or less. Please see the Five Year Housing Land Statement for more information regarding the small sites windfall allowance.

Figure 1: Annual Net Additional Dwellings

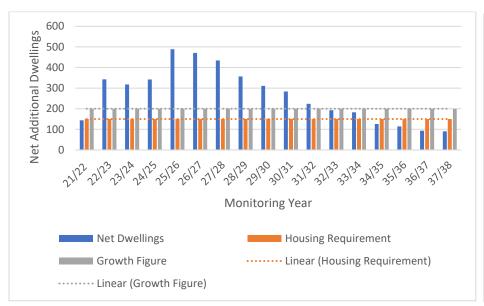

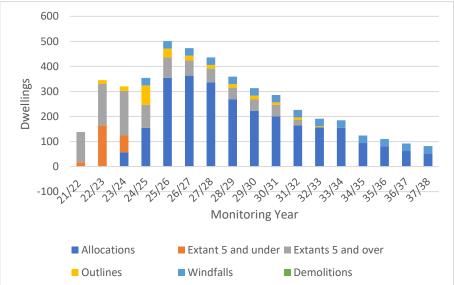

Figure 2: Annual Completions by Source

- 1.8 Figure 2 shows that sites that have planning permission at present (full or reserved matters) form the largest part of the supply in the early years of the plan period; these are replaced in the later years by dwellings on allocated sites.
- 1.9 The majority of homes over the full plan period (2711) will be delivered on allocated sites. Development on windfall sites will also continue to make up a significant proportion of the supply, particularly those that benefit from a current planning permission in the earlier years.
- 1.10 Housing delivery will reach its peak in 2025/26 as there will be completions coming forward on sites that have planning permission at present and delivery will be increasing on allocated sites as many will have gained planning permission by this point.
- 1.11 Housing delivery is projected to drop below the housing requirement in the last four years of the plan period, however a number of Local Plan Reviews will have been carried out by this point which will ensure needs are met. This may be through the allocation of additional sites and/or the inclusion of Broad Locations. It may also be that issues outside the Councils control such as the availability of materials, tradespeople and Covid-19 impact upon delivery rates resulting in a steadier rate of delivery rather than the peak and trough type trajectory shown.

- 1.12 Table 3 breaks the trajectory down by settlement hierarchy tier and summarises tables 4-7. It shows each tier within the hierarchy is able to deliver the amount of housing needed to meet its required needs. Each tier is also able to provide enough dwellings to meet its growth aspirations, with the exception of the Rural Villages and Local Service Centres tiers. This is not however considered to be a problem, or a reason to increase the amount of housing allocated within the tier, as it is likely that a number of windfall developments will take place within the Rural Villages tier over the plan period which will increase supply.
- 1.13 It should also be noted that the following table does not include developments on future windfall sites (which is why the figures differ with those in Table 2 which includes a windfall allowance). The windfall allowance set out in Table 2 is not attributed to any particular settlements. Table 3 also does not account for future demolitions.

Table 3: Breakdown of Housing Supply by Settlement Tier¹²

| Tier | Settlement | Precious actual completions 21/22 | Completions on Allocated Sites over plan period | Completions on Sites with Planning Permission over plan period (Full or RM). Table 7: Annual Delivery on Sites with Outline Planning Permission²⁶

Note: The following figures have been reduced to take into account where part of the site had reserved matters approval at 31st March 2022 including where parts of the site are being developed as self-build plots. In such cases the dwellings with reserved matters approval are counted in Table 5.
