Dear Sir

I writing to you to object in strongest possible way against the proposals made by Copeland Council to create the Traveler/Gypsy site on Greenbank which would be very close to my house.

My objection is not based on race or origin but purely on the effects the introduction of strangers would have on our present community life.

This site is proposed in an area which will affect The Burnt Houses, and Copeland Avenue on Mirehouse

These people as everyone knows are a community of their own, with no desire to mix with or be part of any other communities, Greenbank is at present in my opinion a good place to live with a good community spirit and very little disturbance.

The proposed site whether it be constantly inhabited or empty would drastically reduce the price of my house by thousands of pounds on the open market, very few people would want to buy a property that is within a couple of hundred yards of such a settlement.

The creation of the proposed site, which is actually on land, on our estate could potentially cause conflicts between the two community's.

The introduction of people and children with different views on what is socially correct could be very disruptive.

The reason there are no Traveler/Gypsies in our area at present is because in years gone by when there was a presence, there was couple of serious incidents with clashes between traveler and local youths, we do not want a repeat of what has happened previously.

This is the second time that we have been threatened with the proposal of this site, we had to go through all the same process only a couple of years ago, which is very distressing to residents, this threat hopefully will be removed permanently.

Yours Sincerely,

---

Greenbank is at present in my opinion a good place to live with a good community spirit and very little disturbance.

The proposed site whether it be constantly inhabited or empty would drastically reduce the price of my house by thousands of pounds on the open market, very few people would want to buy a property that is within a couple of hundred yards of such a settlement.

The creation of the proposed site, which is actually on land, on our estate could potentially cause conflicts between the two community's.

[Redacted]

The reason there are no Traveler/Gypsies in our area at present is because in years gone by when there was a presence, there was couple of serious incidents with clashes between traveler and local youths, we do not want a repeat of what has happened previously.

This is the second time that we have been threatened with the proposal of this site, we had to go through all the same process only a couple of years ago, which is very distressing to residents, this threat hopefully will be removed permanently.

Yours Sincerely,

Copeland Borough Council

Dear Sir

I writing to you to object in strongest possible way against the proposals made by Copeland Council to create the Traveler/Gypsy site on Greenbank which would be very close to my house.

My objection is not based on race or origin but purely on the effects the introduction of strangers would have on our present community life.

This site is proposed in an area which will affect The Burnt Houses, and Copeland Avenue on Mirehouse

Dear Sir

I writing to you to object in strongest possible way against the proposals made by Copeland Council to create the Traveler/Gypsy site on Greenbank which would be very close to my house.

My objection is not based on race or origin but purely on the effects the introduction of strangers would have on our present community life.

This site is proposed in an area which will affect The Burnt Houses, and Copeland Avenue on Mirehouse

[Redacted]  
[Redacted]  
Greenbank is at present in my opinion a good place to live with a good community spirit and very little disturbance.

The proposed site whether it be constantly inhabited or empty would drastically reduce the price of my house by thousands of pounds on the open market, very few people would want to buy a property that is within a couple of hundred yards of such a settlement.

The creation of the proposed site, which is actually on land, on our estate could potentially cause conflicts between the two community's.

[Redacted]  
[Redacted]  
The reason there are no Traveler/Gypsies in our area at present is because in years gone by when there was a presence, there was couple of serious incidents with clashes between traveler and local youths, we do not want a repeat of what has happened previously.

This is the second time that we have been threatened with the proposal of this site, we had to go through all the same process only a couple of years ago, which is very distressing to residents, this threat hopefully will be removed permanently.

Yours Sincerely,

[Redacted Signature]
