

## Matter 15, Action 48

Below is the response regarding the accident record for Queens Drive, Egremont.

Accident data was sourced from open source crashmap data: <https://www.crashmap.co.uk/> extracts shown below.

This shows 3 accidents (all slight) in last 5 years – along Queens Drive / Bookwell (but only 1 actually on Queens Drive).

Although there appears to be no real pattern, we've suggested safety improvements along Bookwell as mitigation for future developments...

Also, when looking at a larger scale you can see it's not the worst road in the area for accidents
