EXTENSION & INTERNAL ALTERATIONS – USE OF EXISTING DRAINAGE
Middle Fell Croft, Lamplugh, Workington, CA14 4SQ

Application 4/20/2137/OF1 - Reserved Condition 3 - Drainage

Application 4/20/2137/OF1 was granted planning permission on 1st June 2020, subject to conditions. Condition 3 reads as follows:

- 3) *Before development commences full details of the final drainage system must be submitted to and approved in writing by the Local Planning Authority. The approved scheme must become operational before the development is brought into use and must be maintained thereafter.*

Reason To ensure the provision of a satisfactory drainage scheme.

The property has continued use as a dwelling since permission was granted in 2020 and the Applicant believes the foul waste septic tank, surface water soakaways and associated drains to be satisfactory and in good working order. The extension and alterations do not propose an increase occupancy (e.g. additional bedrooms) or a change in its use.

The Applicant therefore intends to continue using the existing foul and surface water drainage systems and does not intend to alter any part of it as part of this proposed works. This intent was clear in the Full Plan (Building Regs) Submission (ref. 4/20/0113/1), which received conditional approval on 17th April 2020.

Further details of the original application and existing drainage can be found in the following plans, drawings and documents:
