Dear Louise,

ROOF OVER SILAGE PIT (RETROSPECTIVE).

HOLLINS FARM, ENNERDALE, CLEATOR

Thank you for consulting us on the above application, received 5 June 2025.

Environment Agency position.

We have no objections in principle, however we would like to make the following comments:-

The proposed development must fully comply with the terms of the Water Resources (Control of Pollution) (Silage, Slurry and Agricultural Fuel Oil) (England) (SSAFO) Regulations 2010.

The applicant should also ensure the proposed development supports compliance with:

- The Reduction and Prevention of Agricultural Diffuse Pollution (England) Regulations 2018 known as Farming Rules for Water (FRfW),
- The Environmental Permitting (England and Wales) Regulations 2016 (EPR)
- The Nitrate Pollution Prevention Regulations 2015 (NVZ)

Environmental good practice advice is available in The Code of Good Agricultural Practice (COGAP) for the protection of water, soil and air (produced by DEFRA).

Any agricultural development that will result in an increase in cattle numbers or water usage may adversely impact the storage of waste waters, slurry and other polluting matter.

The applicant is advised to consider both the proposed development and existing on-

Cont/d..

farm slurry and manure storage to ensure compliance with the regulations (SSAFO, FRfW, EPR, NVZ).

As a condition of SSAFO, you must notify the Environment Agency of a new, reconstructed or enlarged slurry store, silage clamp or fuel stores at least 14 days before starting any construction work. The notification must include the type of structure, the proposed design and construction.

If the applicant intends to apply for a grant under the Farming Investment Fund – Slurry Infrastructure grant the proposed development must also fully comply with the grant scheme rules, found at - [Slurry Infrastructure grant](#). In this case the SSAFO notification to the Environment Agency will be satisfied by the submission of the grant application form.
