Date:	30.07.2024
Planning Ref:	4/24/2226/0F1
Description:	Alterations and extension for two storey extension with Juliette balcony for living kitchen diner and master bedroom suite.

Bat Survey Report

The County Ecologist has no comments.

Suggested Planning Condition(s)

Bats

- In the unexpected event that a bat is discovered during the works, the contractors will be advised to stop immediately and contact the licensed ecologist whom will travel to site to provide assessment and advice. Contractors will be specifically forbidden to handle bats. Contractors will be advised that if it is necessary to remove a bat to avoid it being harmed, gloves **MUST** be worn. It should be carefully placed in a cardboard box and kept in the dark in a quiet place until the licensed ecologist arrives on site.
- 1 bat box should be installed at the site, to follow Table 5.1 of the Bat Survey Report submitted by Knight Sky Ecology (June 2024).
