

Ecology Team Consultation Response	
Date:	02.09.2025
Planning Ref:	4/25/2285/001
Description:	Outline application with some matters reserved including approval of access for the erection of a two storey dwelling.

Suggested Planning Conditions

Breeding Birds

Works should be completed outside of the breeding bird period (March – August inclusive). If this is not possible a breeding bird check should be carried out no more than 48 hours prior to the planned development to ensure no birds and their nests are present. If active nests are discovered an appropriate buffer zone should be established and works within that area ceased until the young have naturally fledged.

Small Mammals

All development work should be carried out with care to avoid small mammals such as hedgehogs. Contractors should be briefed about the potential presence of hedgehogs and works should be supervised during initial clearance of the site to avoid injury to any disturbed individuals.

Biodiversity Net Gain

No development hereby permitted shall commence until:

- a) a Biodiversity Gain Plan has been submitted to the planning authority demonstrating a 10% net gain,
- b) the planning authority has approved the plan in writing,
- c) the onsite habitat provision is accompanied by a Habitat Management and Monitoring Plan in place for 30 years as the gains here constitute 'Significant On-site Gains', this monitoring plan is to be accepted by the council and,
- d) Monitoring results are to be programmed to be submitted to the council. These should include evidence demonstrating how BNG is progressing towards achieving its objectives, evidence of arrangements and any rectifying measures needed. The development shall be carried out in accordance with the approved plans.
