

Ecology Team Consultation Response	
Date:	27.11.2025
Planning Ref:	4/25/2390/0F1
Description:	Application to determine if prior approval is required for the installation of 1 fibre optic pole (9 metres in height) as part of the upgrade of the fibre optic infrastructure off the A5086.

The Ecological Management Plan suggests that a Habitat Regulations Assessment (HRA) has been produced if an internationally designated site has been identified. Please confirm whether a designated site (SPA/SAC) has been identified and please provide the HRA, should this be the case. If an HRA has been produced, then these suggested planning conditions will be updated upon its receipt by the council.

Suggested Planning Conditions

Precautionary Method of Works (PMoW)

The PMoW produced by Wardell Armstrong as part of the Ecological Management Plan (2025) must be followed throughout the duration of the construction works to protect habitats and protected species and their groups from impact due to the works.

Works must also follow Section 5 of the EMP by Wardell Armstrong for Pollution and Biosecurity Controls.
