Sheet No: WCHPH2-GDA-V99-ZZ-RP-A-99012_Accessible Parking Statement

Client: West Cumberland Hospital NHS Foundation Trust

Job: Phase 2 - West Cumberland Hospital

Job No: 8060P

Copeland Disability Forum – GDA response:

Cumbria County Council parking guidance suggests “1 space or number equivalent to 5% of car requirement whichever is greater” for Hospital developments. There are currently 954 parking spaces on the wider hospital site, including 51 disabled spaces in line with this guidance at 5.3%.

The proposed development as existing would result in a total of 1,059 spaces across the site (a net gain of 101 spaces), retaining the existing number of disabled bays at 51 spaces which equates to 4.8% disabled parking provision. In order to ensure compliance with the CCC parking standards, it is suggested an additional 6 disabled spaces be provided within the proposed parking area (reducing the total net gain to 98 spaces). This would retain disabled parking levels across the site at 5.3%, and ensure that the net parking gain also complies with CCC parking standards at 5.1%.
