

KESWICK SUPERGLAZE SLIDING SASH

KESWICK SUPERGLAZE SLIDING SASI

NEW ULTIMATE SLIDING SASH

New seamless run-through horns

New solid-face run-through horns with re-engineered seamless cap

Tilting sashes for easy cleaning

Staff bead

Detachable internal staff bead that finishes off the inside of the window like a true timber sash.

Ultra slim 35mm midrail

Built exactly the same way as timber

No mitred welds or fake mechanical joints, just simple, strong, joinery style butt joints like a timber original.

Chamber filler

Filling the external balance chambers to give a solid finish, while allowing the sashes to slide.

No horn option

Ultra-slim Georgian-style no horn version, opening up new conservation options.

Deep cill

Timber-like 50mm integrated deep cill option -- twice the depth of standard flush cill.

New astragal bar

Brand new external astragal bar, with different milling profile for a better finish.

PASSES PLANNING IN CONSERVATION

AND ARTICLE 4 AREAS*

QUITE SIMPLY THE UK'S
MOST AUTHENTIC TIMBER-
ALTERNATIVE SASH
WINDOW

In an area where sash windows are common, our sliding sash blend in perfectly – a far superior option than the “tr sash” casement windows and cheap inferior quality sash

The **Ultimate sliding sash** looks and feels just like an original timber sash window, even from close up. They are **authentic** that we have received comments from customers who say that people don't know they have replaced their windows with a timber alternative. That is why they have been approved for use on projects in conservation areas

04 *on most occasions, always check with your local authority.
**from ultimate 2 excluding staff bead and chamber filler

Keswick **Superglaze**

The local company with a **BIG** reputation
