

**Rhodia Stockpiles Investigation**  
Summary of Stockpile Information

Apr-08

Stockpile	Source of Stockpile Material	Stockpile Material Description	Stockpile Volume (m <sup>3</sup> )	No. of Sub Areas / Composite Samples in Stockpile	No. of Sample Increments in each Composite	No of Composite Sample Leachates tested	Summary of Generic Risk Assessments for	
							Human Health (soils analyses)	Controlled Waters (leachate analyses)
1	Material from cleaning out of South Pond	Gravelly silt	1109	3	5	1	No exceedances	GAC slightly exceed for dissolved chromium
2	Material from excavation of South Pond	Sandy gravelly silt	3908	5	10	2	1 sample slightly exceeded GAC for lead	GAC exceeded for dissolved copper
3	Arisings from construction of treatment plant	Gravelly silt	1218	3	5	1	No exceedances	GAC exceeded for dissolved copper
4	Material from edges of South Pond and cleaning out of Sandwith Beck	Gravelly silt with some demolition rubble	1983	4	5	3	No exceedances	GAC slightly exceed for dissolved chromium and copper
5	Material from excavation of North Pond - URS have testing data already so not sampled as part of this investigation	No description in this investigation	627	None	-	-		
6	Material from edges of South Pond and cleaning out of Sandwith Beck	Very gravelly silt with some demolition rubble	237	2	5	1	1 sample exceeded GAC for BaP	GAC exceeded for dissolved copper
7A	Material from cleaning out of Sandwith Beck	Silty clay with concrete gravel	63	2	5	1	No exceedances	GAC exceeded for dissolved copper
7B	Material from cleaning out of Sandwith Beck	Gravelly or sandy silt	31	2	5	1	No exceedances	No exceedances
8	Surplus Ufex capping material (Boulder Clay) - Not sampled as part of this investigation due to existing data	No description in this investigation	1089	None	-	-		

<b>Total volume of all stockpiles</b>	<b>10265</b>
