Proposed Demolition Works

Please describe the building(s) to be demolished

Farm House, adjacent detached Barn and Stable.

Please state the reasons why demolition needs to take place

The barn is in a very poor structural condition and is structurally unsafe. The extent of necessary remedial works to the farm house is excessive and it would be more cost effective to demolish the property.

Please describe the proposed method of demolition

The residual parts of the building will be taken down by mechanical means and loaded into wagons or equivalent for removal from site. Best practice methods will be followed with regards to noise, dust control, etc.

How and where would spoil/rubble be disposed of?

All materials will be removed from site and recycled wherever possible. It is not anticipated that there will be any generation of dirt on the adjacent roads, however the appointed contractor will allow for sweeping the road on a reactive basis as required.

All contractors that carry or collect waste from the site will be required to have a waste carrier's license and all waste disposal facilities should have a waste management licence or permit unless they are exempt. All waste transfers must be supported by the correct documentation either a controlled waste transfer note; or in the case of hazardous waste, a consignment note. See demolition method statement for more detail.

Please provide details of the proposed restoration of the site

See submitted Demolition Method Statement for details.

When do you expect the works to commence (date must be post application submission)?
