Description of the Proposal

Please note in regard to:

- **Fire Statements** - From 1 August 2021, planning applications for buildings of over 18 metres (or 7 stories) tall containing more than one dwelling will require a 'Fire Statement' for the application to be considered valid. There are some exemptions. [View government planning guidance on fire statements](#) or [access the fire statement template and guidance](#).
- **Permission In Principle** - If you are applying for Technical Details Consent on a site that has been granted Permission In Principle, please include the relevant details in the description below.
- **Public Service Infrastructure** - From 1 August 2021, applications for certain public service infrastructure developments will be eligible for faster determination timeframes. See help for further details or [view government planning guidance on determination periods](#).

Description

Please describe details of the proposed development or works including any change of use

The proposal is to provide an additional 7 solar lights to complete coverage of the Millom Community Track. The Millom Community Track (Installed in 2021) is becoming more popular by the day (and night) with users numbering more than 50 on some nights. Two previous approved applications of 11 and 10 solar lights (application - 4/21/2288/OF1 and 4/22/2353/OF1 (PP-11428151)). These were installed to the very darkest parts of the track and the final addition of the planned 7 lights will give more or less total light coverage to the track. There is a lighting design provided by Prolectric that illustrates the design layout of the original 21 solar lights with the addition of a further 7 solar lights. There is a key attached to the design that indicates the existing 21 solar lights that are currently in situ plus the additional 7 solar lights. The design also indicates the lux and the amount of light it would produce on the layout. The new lights are to fill in the areas which we know to be poorly lit areas. The new areas to be lit are near the residential houses on Salthouse Road but are behind the tree line on the perimeter of the track, will be facing away from the houses and are of a lower brightness than the current permanently lit street lighting. There is an area to the back of the houses that back onto the culvert, but again these are a significant distance away from the houses and there is also a woodland area between the back of the houses, the culvert and the trees before the perimeter of the track. All the lights again are positioned on the outside edge of the track with the lights facing onto the track and away from any residential housing. As per the previous applications the lights will come on automatically to an ambient status of 30% at dusk for a maximum of 6 hours. When members are using the track the PIR's will detect movement and raise to 100% output. While there is movement the lights stay at 100% and go back to 30% after approx' 1 minute. After 6 hours and not beyond 10pm approx' the lights will turn off. There will be no PIR motion detection after 6 hours or 10pm. Security lighting has been addressed by the Government following the murder of a female on Clapham Common, London and more recently in 2022, Ashling Murphy. Following the installation of the 21 original lights on previous planning applications, we are more aware of the dark unlit areas and feel that we need to fill in these gaps with additional lighting as soon as the funds are raised. Prolectric AE3 luminaires are high quality, year round, solar powered LED units mounted on 6m root columns. They provide permanent lighting. Simple and quick to install. There is no need to dig drenches or install trunking cables.

Has the work or change of use already started?

☒ No

Existing Use

Please describe the current use of the site

The community track is in full use the whole community including Millom school. It has proved to a valuable asset to the community and is regularly used by Millom Striders Running Club (juniors and seniors), Millom Rugby League Club, Parkrun, Millom Velo Club as well as individuals. It is providing a safe and secure facility for people to exercise when either running, walking or cycling.

Is the site currently vacant?

- ☐ Yes
☒ No

Does the proposal involve any of the following? If Yes, you will need to submit an appropriate contamination assessment with your application.

Land which is known to be contaminated

- ☐ Yes
☒ No

Land where contamination is suspected for all or part of the site

- ☐ Yes
☒ No

A proposed use that would be particularly vulnerable to the presence of contamination

- ☐ Yes
☒ No

Materials

Does the proposed development require any materials to be used externally?

Biodiversity and Geological Conservation

Is there a reasonable likelihood of the following being affected adversely or conserved and enhanced within the application site, or on land adjacent to or near the application site?

To assist in answering this question correctly, please refer to the help text which provides guidance on determining if any important biodiversity or geological conservation features may be present or nearby; and whether they are likely to be affected by the proposals.

a) Protected and priority species

- ☐ Yes, on the development site
☐ Yes, on land adjacent to or near the proposed development
☒ No

b) Designated sites, important habitats or other biodiversity features

- ☐ Yes, on the development site
☒ Yes, on land adjacent to or near the proposed development
☐ No

c) Features of geological conservation importance

- ☐ Yes, on the development site
☒ Yes, on land adjacent to or near the proposed development
☐ No

Supporting information requirements

Where a development proposal is likely to affect features of biodiversity or geological conservation interest, you will need to submit, with the application, sufficient information and assessments to allow the local planning authority to determine the proposal.

Failure to submit all information required will result in your application being deemed invalid. It will not be considered valid until all information required by the local planning authority has been submitted.

Your local planning authority will be able to advise on the content of any assessments that may be required.

Biodiversity net gain

Biodiversity net gain is a legal requirement for planning permission introduced on 12 February 2024. All applications are required to either provide detailed information proving there will be a biodiversity increase; or explain why the requirement does not apply to the development.

[Find out more about biodiversity net gain, and access digital tools from our partners that can help determine if you are exempt, or produce the biodiversity metric information required.](#)

Do you believe that, if the development is granted permission, the general Biodiversity Gain Condition (as set out in [Paragraph 13 of Schedule 7A of the Town and Country Planning Act 1990 \(as amended\)](#)) would apply?

- ☐ Yes
☒ No

Biodiversity net gain has been introduced as a general condition for planning permission. As set out in [The Environment Act 2021](#): "grants of planning permission in England [are] to be subject to a condition to secure that the biodiversity gain objective is met". Therefore, in England, all planning permissions are generally subject to biodiversity gain rules, unless they are specifically exempt or out of scope.

If you have stated that the biodiversity net gain requirement does not apply to your application you must provide the reason(s) why, and may also need to supply evidence (especially where you believe the application is eligible for the 'de minimis' exemption).

[You can use our partner's free online tool to determine if you are exempt and to produce detailed reasons](#)

Please add all the reasons why biodiversity net gain does not apply and enter a justification for each one

Reason biodiversity net gain does not apply:

Development subject to the de minimis exemption (development below the threshold)

What best describes the size of your site?:

Under 25 square metres

Please justify the reason why biodiversity net gain does not apply:

Although the site is approx' 0.5 hectares, the solar light columns are only 140mm in diameter.

Note: Please read the help text for further information why developments may be exempt or not in scope.
