Details of the pre-application advice received

On the 28th March 2023, Tetra Tech Planning carried out pre-application engagement with the Planning Case Officer – Mr Chris Harrison. The aim of the pre-application engagement was to discuss and agree the scope of the technical documents that would be required to validate and enable a successful TDC application. On the 29th March 2023, Mr Harrison confirmed the validation requirements for a TDC are effectively the same as any Full Planning Application. Mr Harrison referred to appeal reference: APP/Z0923/W/20/3246227, which established the principle of residential development only and gave no consideration or approval to any technical issues i.e. design, layout, access, drainage, ecology etc. In subsequent email exchanges on the 3rd April 2023, Mr Harrison confirmed that the land as being at low risk and so a Coal Mining Risk Assessment would not be required. Furthermore, a Tree Survey would only be required if there are trees on or adjacent to the application site with a trunk diameter exceeding 75mm at 1m in height that would be impacted by the proposed development. The list of technical supporting documents agreed with Mr Harrison have been submitted with this TDC application. Further dialogue has taken place with Mr Nick Hayhurst regarding amendments to the red-line of the scheme, which are now submitted. Mr Hayhurst confirmed that no application fee is required as this application replaces a previous detailed application that was withdrawn in March 2023 - 4/22/2492/0F1.

For the purposes of this question, "related to" means related, by birth or otherwise, closely enough that a fair-minded and informed observer, having considered the facts, would conclude that there was bias on the part of the decision-maker in the Local Planning Authority.

Do any of the above statements apply?
