

CUMBERLAND COUNCIL
CONSULTATION RESPONSE

Proposal: Installing kitchen in ground floor, installing four solid fuel stoves and installing decorative window grilles to basement and ground floor windows

Address: 153 Queen Street, Whitehaven

Reference: 4/24/2078/OL1

Date: 23/04/24

Description: 153 Queen Street is a Georgian town house, grade II listed, part of one of Whitehaven's most attractive rows.

Conclusion: No objection

Assessment:

- Removal of the old kitchen from the basement appears to entail neutral impact on the significance of the building.
- Installation of the new kitchen on the ground floor will make use of existing service penetrations, and should be accomplished without disturbing historic features within the room so it could in theory later be reversed. This would appear to entail neutral impact on the significance of the building.
- The installation of the proposed solid fuel stoves into existing fire surrounds appears to entail neutral impact on the building.
- I'd view the installation of the window grilles to entail negligible harm to the exterior of the building, justified on the basis of providing better protection to the windows.

Relevant Policies and Guidance:

The Planning (Listed Buildings and Conservation Areas) Act 1990 establishes a need "in considering whether to grant listed building consent for any works [for the Local Planning Authority to] have special regard to the desirability of preserving the building or its setting or any features of special architectural or historic interest" [Section 16(2)].

Section 72 of the 1990 Act states that "special attention shall be paid to the desirability of preserving or enhancing the character or appearance of [a conservation] area."

NPPF para. 197 states that "In determining applications, local planning authorities should take account of the desirability of sustaining and enhancing the significance of heritage assets and putting them to viable uses consistent with their conservation..."

NPPF para. 199 states, in the case of designated heritage assets, "great weight should be given to the asset's conservation", irrespective of whether potential harm is substantial, less-than-substantial, or total loss. Where harm to a designated heritage asset is less-than-substantial, it should be weighed against the public benefits of the proposal (para. 202).

Referring to assets in a conservation area, NPPF para. 207 states that loss of an element that makes a positive contribution to a conservation area should be treated as either substantial (under para. 201) or less-than-substantial harm (under paragraph 202).

The former Copeland Borough Council's Local Plan contains a number of relevant policies:

- Local Plan Policy ST1C(ii) highlights the importance of protecting, enhancing and restoring the Borough's cultural and heritage features and their settings.
- ST1D emphasises the council's commitment to creating and retaining quality places.
- ENV4A stresses the importance of protecting listed buildings, conservation areas and other features considered to be of historic, archaeological or cultural value.
- ENV4B outlines support for heritage-led regeneration, ensuring assets are put to appropriate, viable and sustainable uses.
- ENV4C aims to strengthen the distinctive character of settlements through high quality urban design and architecture that respect character and setting.
- DM27A outlines support in principle for developments that "protect, conserve and where possible enhance the historic, cultural and architectural character of the borough's historic sites and their settings".
- DM27D highlights the necessity of avoiding disrespectful alterations, substantial demolition, adverse effects on setting or views, or changes of use that harm the conservation or economic viability of a listed building.

The Conservation Area Design Guide is a supplementary planning document adopted in 2017 that is a material consideration in the determination of planning applications within conservation areas in the legacy Copeland area. It is therefore applicable to this application.

Sammy Woodford

Conservation and Design Officer
