Hi Chris,

I am responding to the UU letter which states that there is a water main running through plot 46. To evidence this is not the case, I have attached a pdf of the Aptus Utilities water main drawing (approved by UU prior to installation) which clearly shows the 63mm water main terminate at the end of the turning head with a wash out (WO). The water main is therefore not within the boundaries of plot 46. To avoid any further confusion, this drawing was prepared in 2018 and the plot numbering shown is different to my site plan submitted with the application so my site plan takes precedence in this regard.

I trust this deals with the query satisfactorily and enables you to determine the application favourably.

Look forward to hearing from you.

Regards,
Glen
