Hi Chris,

Thanks for the email which I have now discussed with the applicant.

I have read the UU consultee response and can confirm that the development of plot 45 is circa 175m north of the existing strategic water main asset. The submitted site plan (drawing no. 06/11/542 – 218) doesn't show the water main asset as it is off the bottom of the page so to demonstrate the above I have attached a pdf of a reduced scale site plan (1:2500 @ A4) which shows the existing strategic water main asset as a pink dash/ dot line. Plot 45 is highlighted by the usual red line boundary. I hope this deals with the query satisfactorily.

I note from my file that the 8-week target decision date is 27/05/25 so can you confirm if the application is likely to be determined by the due date please?

Look forward to hearing from you.

Regards,
Glen
