Good afternoon Chris,

We now have sufficient information to share in addressing the previous queries/objections, largely drainage related.

Please find attached:

1. Correspondence from Wates which confirms the nearby drain was cleared from debris and repaired as necessary.
2. Surface water exceedance route plan.
3. Catchpit/hydrobrake detail plan.
4. Correspondence from United Utilities which works towards a pre-commencement condition in place of their previous objection.
5. Revised DAS with the corrected hours of use key now shown, tying in with those noted in the main application form.
6. Lite CMP for the attention of Sport England in demonstrating that the construction phase would not impact any playing fields, against their suggested condition.

I welcome your thoughts on the above/attached information Chris. Were there any wider queries that we might comment on at this time (noise or lighting for example)?

Kind regards
