Good afternoon Chris

Please find attached additional details as requested by the Conservation Officer which addresses the items raised in their consultation dated 16 Feb 2022.

The one element not provided at this stage is details of the chimney stack works which at this stage it is not known if this is actually required. Works however in this area will be deemed repair works and therefore will consist of taking down the chimney to below the roof level and simply re-building in the same removed stonework with a new full width Code 5 lead tray. I do not believe 'repair' works require consent.

If you have any further questions please advise as we are keen to have this application determined.
