Following letter explaining why we need the  
Shipping container and the fence,

To whom it may concern,  
The shipping container we have placed in the garden for mixed  
used storage due to health and safety visit and advised that  
we need to remove from the shop which not related to  
catering like kids pram, lawn mower, Diy tools and kids playing  
toys as we have three kids aged 5, 3 and 1, The flat above  
the shop where we live is not big enough or safe for the  
kids to keep all and too hard to take them upstairs as myself  
always working and my wife has health problems on her back.  
We also need the container to keep spare equipments like fridge  
and freezers as we got new cold room and walk in freezer for the shop  
We like to keep old ones incase something happens to new ones  
so we can use the old ones till it get sorted,

The reason we placed the shipping container on where it is,  
away from the junction, far end in the garden so we can  
use the garden for the kids so there is enough space to play,  
and it does not block the sunlight for the neighbors,

Thank you
