This is a hand-drawn architectural elevation of a building facade. The left portion of the drawing shows a steep gable roof with a small square vent or window at its peak. The gable and the main wall below it are clad in vertical siding, represented by a series of parallel lines. To the right of this section is a flat wall featuring a small, vertically oriented window with two panes, each containing a green-tinted glass insert. Below the main wall line, a rough sketch indicates the foundation and a small section of a stone wall on the far right. A dashed horizontal line runs across the upper part of the drawing, likely representing a roofline or a section cut.
