

Design and Access / Heritage Statement

My kitchen is at the back of my property looking out onto the courtyard area and I propose ~~to~~ put a window into the side wall which looks out onto the lane entrance to the courtyard.

There are two existing windows but they are very small and only get any light in the morning which means I need to have the lights on most of the day. The new window would let in much needed light especially in the afternoon & early evening. The proposed window would be to the side of the kitchen.

I have consulted the neighbours & they are very happy for me to proceed. I am happy to use any suitable material but as all the existing windows in the house, and on the row of adjoining houses, are rosewood P.V.C. I think it would look better if it matched them.

I find it strange that it is only this row of houses that are listed when all the others in the abbey farm complex are not and they were all built around the same time & in the same design.

I hope you can approve my design & I look forward to hearing from you
