

Constructors must only work to figured dimensions which are to be checked on site. Do not scale from hard copy drawings.

[illegible]

A diagram of a circle representing a celestial body. A vertical dashed line passes through the center and is labeled "True North". Two other dashed lines originate from the top of the circle, forming an angle. The angle between the vertical line and the left dashed line is labeled θ . The angle between the two dashed lines is labeled α .
