

Two Storey Modular Building

Addendum to Ecology Assessment (Phase 1 Habitat Survey)

This addendum has been produced to support the above Ecology Statement (Phase 1 Habitat Survey) that was produced in 2021 following a site walkdown of the proposed location for the replacement Calder Hall Site Emergency Assembly Point (SEAP) Project following the intended demolition of the former Calder Hall Management Centre to support the SIXEP Contingency Project (SCP).

This is to confirm that the findings of the above report are still valid, noting that since the report was written, the trees and vegetation in the area have been successfully cleared/removed.

This note has been prepared by a Sellafield Ltd Environmental Specialist.
