**Subject:** PLANNING APP 4/25/2260/DOC - 6-8 DUKE STREET, WHITEHAVEN

Discharge of condition 6 of planning application 4/21/2364/OL1

Thank you for the above planning application.

Environmental Health have assumed, from experience, that noise emitted by any inverter unit/s associated with the solar panels would be minimal and less than 30 dB given the small scale of the development.

This would be under the measured local night time background noise level of 31 db LA90 (15 mins) referenced in the Noise Impact Assessment submitted in support of planning application 4/25/2207/DOC.

It would be helpful to confirm the details and noise rating of any inverter unit/s for this development for the sake of completeness however.

Regards
