Subject: PLANNING APP 4/24/2415/0F1 - MILLOM SCHOOL, SALTHOUSE ROAD, MILLOM

Installation of an additional 7 solar lights to complete coverage of the Millom Community Track

Thank you for the above planning consultation.

Environmental Health are supportive of this proposed development that helps to provide a valuable community asset.

However, the solar lights can potentially cause disturbance to residential amenity, light pollution and disturbance to nocturnal wildlife if the lights were to be left on overnight.

As per the previous two planning approvals for the solar lighting (ref 4/21/2288/0F1 and 4/22/2353/0F1) it would therefore seem sensible to restrict the times that the solar lights may be used.

The following condition is requested if planning approval is granted –

- Artificial Light (external)

The solar lights hereby approved must not be in operation past 22.00 hours on any day.

Reason: In order to protect the amenity of nearby residential premises.

Regards
