

THE PLAN IS FOR A STEEL FRAMED BUILDING 13 METRES WIDE WITH A HEIGHT OF 16FT (5m) AT THE FRONT OF THE BUILDING AND TWO DOORS, ONE WHICH WILL BE A ROLLER SHUTTER FOR CARS (5 METRES WIDE) AND A STANDARD PEDESTRIAN DOOR. THE DEPTH WILL BE 6 METRES FRONT TO BACK, THE ROOF WILL BE A SLOPED ONE DOWN FROM 5 METRES TO 4.572 METRE SLOPE AT THE BACK, WE WILL CLAD THE GARAGE IN GREEN ELECTRICAL COATED SHEETS SO IT WONT COLLIDE WITH THE ENVIRONMENT. MANY THANKS. TREVOR HENDERSON
