Good afternoon Christie,

Thank you for your email, it is proposed that the EV Chargers will be available 24/7. As for the noise levels, the operating noise is <65 DB.

hypercharger 150	
75kW / 150kW fast charging system for electric vehicles	
Technical Data	
System Specification	
DC-connection standard	CCS1 or CCS2 uncooled cable acc. IEC 62196 CCS Combo2 active cooled cable acc. IEC 62196 Optional: CHAdeMO and/or 22kW AC plug
Ambient	In- and Outdoor installation
Working temperature	-30° to +55°C
Humidity	10% - 90% relative humidity
Protection degree	IP 54
Efficiency	94% @ full power
Operating noise level	< 65dBA

I trust the above is helpful, but should you have any further queries, please let us know.

Thank you.

Good afternoon,

I write further to the above application which you are registered as the agent for relating to Warton Garage, 1 Duke Street, Millom.

I have received the following request from the Council's Environmental Health Officer:

Prior to our formal response to the above planning application, can you ask the agent to confirm a couple of details please?

- Is it proposed to make the EV charging points available for use on a 24 hours basis?
- Are the EV charging points fan cooled and, if so, is there a noise rating for them?

There are some concerns around potential night time noise disturbance from them, although EH have not had any complaints at other EV charging points in the district.

I would be grateful if you could provide a response to the above.

Please note that the advice in this email is given in good faith on the basis of the information available at the present time. The advice may be subject to revision following further examination or consultation, or where additional information comes to light, and is therefore not binding on any future recommendation which may be made to the Council or any formal decision by the Council.

Kind Regards,

Christie Burns MRTPI
