Hi Adam

I have spoke to Kim Tullet and he advises that they cannot prove anything so I have wrote the response below:-

As I am sure you will appreciate the number of cattle on the holding at any one-time fluctuates due to many market forces and seasonal events.

However the purpose of the additional building is not to increase numbers but to manage the present numbers better.

This will improve animal husbandry, reduce costs and also reduce the impact on the local environment as to reduce stocking density and hence noise and smell.

Part of the new building will be to house a new handling facility. This will move the existing handling facility from the present location on the roadside at the front of the site.

Kind Regards

Ross
