**To:** Development Control  
**Cc:** Christie Burns  
**Subject:** 4/26/2100/0F1 - HILL FARM, HOLMROOK

Proposed cattle / livestock building to include isolation facility, TB test isolation pens, calving & medical pens and cattle handling system, occasionally farm machinery would also be stored in the building

Thank you for the above planning consultation.

It is understood that this application will not see a rise in the numbers of cattle at the farm, rather it is mainly for the provision of improved animal welfare facilities.

Whilst there have been complaints of noise, odour, pests, and artificial lighting to this Environmental Health team in the past, there have not been any complaints since August 2025. On this basis, Environmental Health do not object to this application.

Regards
