Our ref: PLC/BCC/2004

Dear Heather,

Planning (Hazardous Substances) Act 1990 / Planning (Hazardous Substances) Regulations 2015 / Planning (Hazardous Substances) (Amendment) Regulations 2017- Hazardous Substances Consent application for the Sellafield site

Sellafield Ltd operates a number of processes on the Sellafield nuclear licensed site, some of which involve the storage and use of hazardous substances. Following discussions with the relevant regulator, the Health & Safety Executive (HSE), Sellafield Ltd wish to apply for a new Hazardous Substances Consent covering the relocation of diesel into new tanks.

The substance which is the subject of the application has been used on the Sellafield site for many years. Accordingly, there is minimal change to the volume of the substance used on the Sellafield site recorded by the submission of this application. This application is formalisation of the HSE request to include further hazardous substances used at the Sellafield site on the face of a consent. Following the commissioning of the new fuel storage facilities, the plant operators have updated their associated COMAH Major Accident Hazard Report Annexes under the appropriate regulations.

Accordingly, I attach:

1. The completed "Application for express consent for relocation of diesel into new tanks" form;
2. The site map 1 BE 3032289 Rev A;
3. The notices required by regulations 6 and 7 of the Regulations.
 - Copy of public notice (advertised in the Whitehaven News on Thursday 29th of April 2021)
 - Form 1 Certificate A
 - Form 2 Certificate B
4. The general plan showing the location of the new storage tanks ("Fellside CHP New Oil Tanks"). **Please note this plan must not be published into the public domain.**

The fee of £200.00 payable under regulation 21(1)(c) has been sent and can be identified as part of payment reference number 2000331623.

If you require any further information, please contact me.

Yours sincerely

Marc Ross
