## Swisspearl Cedar Plank Original - 3600 x 180 x 8mm

### Description

#### Swisspearl Cedar Plank Original (3600 x 180 x 8mm)

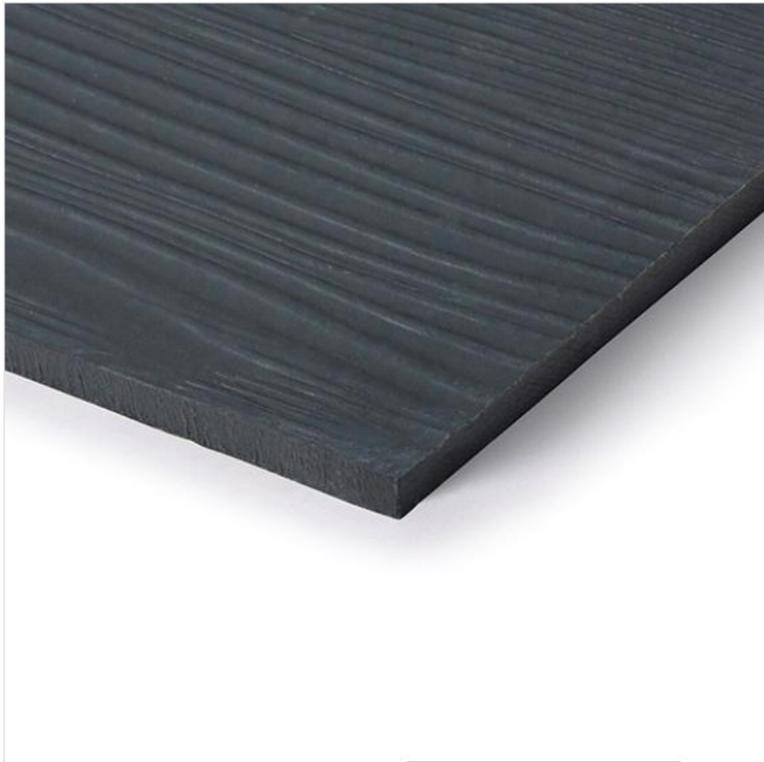

external cladding is a new fibre cement facade product that is optimally adapted to the European climate. It offers the ideal solution to replace the use of high maintenance wood on your facade.

Because of the excellent properties of fibre cement, it does not rot, crack, warp or require repainting. The typical long service life of fibre cement gives maximum resistance to exterior exposure that is backed by a Swisspearl 15 year warranty and is non-combustible.

The planks are lightweight compared to their great strength and ability to withstand external influences and feature a high pH value that makes them resistant to algae, bacteria, moss and fungi. These Swisspearl planks provide a cedar structure with a natural, stunning finish and a large variation in the pattern. The planks resemble wood but contain all the strong characteristics from fibre cement. They feature a durable and long-lasting paint, which ensures that the expression of the planks will remain realistic and true.

### Key Features of Swisspearl Cedar Plank Original

- 15-year Swisspearl warranty
- EN 13501-1:2019 Fire classification of construction products and building elements. Classification A2-s1, d0
- Helps to eliminate maintenance and moisture problems
- EN 12467:2012+A2:2018 Fibre-cement flat sheets
- Natural look with limited maintenance
- Complete range of finishing trims
- Exceptional UV resistance
- Moisture resistant
- Easy to install
