Dear Chloe

Thank you for consulting Natural England on this proposal and apologies for the delay in our response. As the applicant is not increasing the herd size there will be no additional air quality impacts as a result of this proposal.

Natural England advise that a pre-commencement survey for natterjack toads by a suitably qualified ecologist is undertake prior to construction, and that [suitable mitigation](#) is implemented under a natterjack toad mitigation licence if required as a result.

Yours sincerely

Kate Berry
