

## Product Description

### Klargester Gamma 3500 Litre Septic Tank - Twin Stage

The Twin Stage Gamma Septic Tanks have an internal partition wall. This makes your tank work even better and fits the Scottish regulation for tank installations.

Kingspan Klargester has developed Gamma as a direct response to market needs – an affordable and reliable septic tank that is easy to install in a range of domestic applications. This Septic Tank is a suitable capacity for 10 people. Complete with Standard Inlet Invert: 1000mm and Standard Outlet Invert: 1050mm

The Klargester Gamma Septic Tank is manufactured from MDPE which makes it more robust than traditional GRP septic tanks. The Klargester Gamma is ideal for installation where handling of the tank may be problematic.

#### Features & Benefits:

- Fully compliant, tested and approved to EN12566 Part 1
- CE marked to comply with Construction Products Regulations
- Simple to install for reduced on-site installation time
- Reduced excavation costs, saving you money
- Less soil disposal and less backfill material - kinder to the environment
- Made from MDPE - strong and durable for ultimate reliability
- Light, watertight and chemically resistant
- Robust, weather proof for guaranteed durability, giving you value for money

#### Septic Tanks

A septic tank consists of a two or three chamber system that retains sewage from a property for sufficient time to allow the solids to form into sludge at the base of the tank, where it is partially broken down through anaerobic digestion. The remaining liquid in the tank then overflows from the tank by means of an outlet pipe to a drainage field. Septic Tanks have a 1.0m standard invert depth.
