Our ref: PLC/BCC/2004

Dear Heather,

Planning (Hazardous Substances) Act 1990 / Planning (Hazardous Substances) Regulations 2015 / Planning (Hazardous Substances) (Amendment) Regulations 2017- Hazardous Substances Consent application for the Sellafield site

Sellafield Ltd operates a number of processes on the Sellafield nuclear licensed site, some of which involve the storage and use of hazardous substances. Following discussions with the relevant regulator (Health & Safety Executive), Sellafield Ltd is required to apply for a new Hazardous Substances Consent.

The substances, which are the subject of the application, have been used on the Sellafield site for many years. Accordingly, there is minimal change to the types or volumes of hazardous substances used on the Sellafield site marked by the submission of this application. This application is formalisation of the HSE request to include all hazardous substances used at the Sellafield site.

Accordingly, I enclose:

1. The completed "Application for hazardous substance consent" form.
2. The site map 1 BE 3032289 Rev C.
3. The notices required by regulations 6 and 7 of the Regulations.
 - Copy of public notice (advertised in the Whitehaven News on Thursday 2nd June 2022)
 - Form 1 Certificate A
 - Form 2 Certificate B
4. The chemical storage general location plan ("Substance Location Plan 21-05-22").

The fee of £400.00 payable under regulation 21(1)(b) will be sent separately.

If you require any further information, please contact me at marc.o.ross@sellafield sites.com.

Yours sincerely

Marc Ross
Planning Liaison Team
Sellafield Ltd.
