VIEW ON GABLE END

Framework:

- 406 x 178 x 54Kg UB stanchions.
- 305 x 165 x 40Kg UB portal rafters.
- 254 x 146 x 31Kg UB Gable Pillars.
- CHS coves ties
- CHS rafter braces in both end bays of the roof and vertical bracing in both end bays of each side.
- Pressed steel galvanised purlins.
- Pressed steel galvanised wallplates.
- Pressed steel galvanised rails.

Cladding:

- Roof: 40mm thick insulated composite panel sheeting, with a PIR, LFC approved foam insulated core, formed with the insulation material bonded between the outer 0.5mm thick plastic coated weather sheet and the internal 0.4m white faced polyester liner panel complete with seventy two composite G.R.P. rooflights, crown ridge, barge flashings and foam ridge fillers. Each eave to have trinline box type gutters complete with PVC fall pipes.

Verticals:

- 40mm thick PIR core composite panel sheeting, complete with vertical corner flashings, bottom eill flashings.
- all cladding materials to be agreed with the local authority, but generally to match the existing adjacent buildings.
