Hi Louise

The existing footprint of the Dalton Cumbrian Facility is now full, and the storage container allows us to hold materials and equipment that enables us to continue our research and experiments. There is an aspiration to expand the Dalton Cumbrian Facility, either by extension to the existing building or construction of a new building on an adjacent plot on Westlakes Science Park. Within these future expansion plans additional permanent storage would be incorporated, however due to current financial pressures that UK universities are experiencing these plans are uncertain at present. The storage container allows us to keep storing our surplus equipment until a decision is reached on future expansion.

Kind regards,
Rebecca
