BNG STATEMENT

1.0 Introduction

1.1 On 2nd April 2024 BNG regulations were introduced for all small scale developments. However exemptions are provided for developments that will have a 'de minimis' impact on BNG. These include:-

1. Development which only impacts on onsite habitat with a biodiversity value of zero so no gain would be required if there was no exemption;

2. Developments where there is only a de minimis impact on other onsite habitat to ensure biodiversity net gain is applied proportionally;

3. Minor development in established areas of habitat where the development would have less than 25 square metres (or less than 5 metres for linear habitat) impact on this habitat (unless priority habitat); and

4. Change of uses to development where there is no or only a de minimis impact on onsite habitat.

1.2 It is considered that this planning application is within the scope of the de minimis exemption and the main reasons are:-

- This is predominantly an application for new signage, shopfront, window frames, and replacement air conditioning condenser units, where there is no impact on onsite habitat
- There is no net increase in the footprint of the building and effectively translates to being 25 m² below the threshold of minor development requiring a BNG assessment.
