

Product Description

Our Part Q Compliant Anthracite Grey UPVC Sliding Patio Doors are an excellent choice if you require a door to fit where opening sashes are not an option. Due to the sliding door design, the Sliding patio door system can be fitted in to more compact rooms that won't allow the fitting of opening style doors. Both sturdy and flexible in design, a sliding patio door will allow you to flood your living area with light. The design allows the unbroken glass area to be larger than most other types of doors allow. Available in 2, 3 or 4 door designs and stocked in standard sizes in White and Anthracite Grey, we are sure to have a door in stock to meet with your requirements.

Our white standard Sliding Door sizes are offered with the slider on either side. All Our Sliding patios are delivered with the doors pre-fitted into an assembled frame, and the glass separate. 4190mm Wide x 2090mm High (Note, this refers to the external dimensions of the frame including the cill and vent) 4 Door style option (2 Outer fixed doors and 2 Central sliding doors) Extender kits available in 15mm or 25mm to increase overall width.

Steel reinforced 70mm uPVC profiles. Laminated External and Toughened Internal Glass Double Glazed Units for Maximum Security. Internally beaded for improved security. PAS24 Rated High Security Multipoint Locking System for Maximum Security Includes handles, cill and ventilator. Exceptional energy efficiency with Part L Compliant U-value as standard. 10-year product guarantee - terms apply. Manufactured in the UK.

If you require any specialist advice or information regarding any of our products, please call us on **0115 647 7435**. Alternatively, check out the [Technical Information](#) page for more resources including installation instructions / fitting guidelines.
