

Hi Sarah,

The existing windows of the building are White, Double Glazed, uPVC windows.

Some of the existing window openings are boarded up.

It is proposed for all existing windows that are in good condition to be retained as existing, refurbished as and where necessary.

It is proposed for any new window and door, to Match Existing.

Please see the attached photographs.

These latest proposals have been drawn up to secure a viable reuse and refurbishment of the building, for this to succeed additional or unjustified costs must be avoided.

To further respond to comments made by the Town Council, the previous approval (application 4/24/2009/0F1) will not be moving forwards. Unfortunately, these proposals are unviable and hence this latest application.

Please let me know if you need anything further from us.

Thanks

Spencer
