I we been asked to account for the treatment of giant hogweed and Japanese knotweed on a plot of land behind The Ennerdale Hotel at Cleator.

We started the treat of the weeds mentioned above in 2016. We started this in May and finished at the end of Octobers of that year which consisted of 5 visits that year using a chemical named Broadshot. The visits were more this year due to the large infestation of the weeds, each visit was approximately 3 weeks apart.

2017 we visited the site 5 times using a chemical called Kaskara which was replaced the chemical Broadshot. The weeds had died by about half.

2018 we visited the 4 times using chemical called Icade this has decreased due the decline in the weeds which upon the last visit which was 29 September, there was only 2 plants showing of giant hogweed and a few plants of Japanese knotweed and different areas.

Yours Faithfully

Mr C Roberts

Managing Director

Contract Maintenance. Industrial, Domestic & Agricultural Fencing. Dry Stone & Mortar Walling.
All aspects of Tree Work. Chemical Spraying. Turf Lying. Patios, Driveways. Ponds. Chipper hire.
All aspects of Building Work.
