

This my supporting statement for the hair salon at 32 Snaefell terrace Whitehaven Cumbria ca28 9qf as there is no hair salon in the area of woodhouse, Kells also the new housing development in the area and the wider area of Greenbank I think this would be a great service that I could provide for all ages of the community. I think the salon would work well and benefit the community as some of the residences do not drive and have no access to a car and has to depend on the bus service or a taxi to get into town. There might be some residence's walking to the salon and also driving to the salon if the residence's drive to the salon I can provide 2 parking spaces on my drive in the front of my house and the salon. I have provided a photo and measurements of the drive with my application as there would be only myself working there I would only have 1 client in at a time and sometimes there would possible be two client's there only if I had a client booked in for a perm or colour and a client is getting a cut inbetween. The opening times I would to put forward is:

Monday 9am to 7pm

Tuesday 9am to 7pm

Wednesday closed

Thursday 9am to 6.30 pm

Friday 9am to 6.30pm

Saturday 9am to 5.30pm

Sunday closed

The equipment I would be putting in the salon would a hairdressing backwash sink the plumbing for this would be contacted to the upstairs shower room that is located up above the garage and the waste pipe would be contacted to the upstairs shower room waste pipe that is located at the other side of the garage wall. I would have 2 workstations most of the time only one would be used but if I have a client in having a colour or a perm and have a cut inbetween this would allow both clients to be seated and have a comfortable place to be in the salon .I would have 1 seat in the salon waiting area for a client to sit while waiting to get their hair done. I would have a small reception desk to store a till and appointment book. I would have a cupboard to store hair products, also I would have a towel rail on the wall to store towels and a hanger on the wall to store client's jackets and cutting gowns. The electrical equipment that would be used would hairdryer, straighteners, clippers , curling tongs and hooddryer .
