LIGHTING & MATERIALS 1

PLANTING SCHEDULE \(\sqrt{} \)

LIGHTING

All open areas that are in heavy shade will be planted with a mixture to establish wildflowers in areas of heavy or dense shade. Species in this mix are frequently found in wooded areas, alongside woodland edges and where shade may be heavy or prolonged.

Agrimony, Angelica, Avens, Bedstraw, Bellflower, Betony, Bluebell, Buttercup, Campion, Clary, Columbine, Foxglove, Hedge Parsley, Meadowsweet, Mustard, Ragged Robin, Sage, St John's-wort, Teasel, Vetch, Vetch, Wild Garlic / Ramsons, Woundwort, Yarrow.

All open areas not in shade will be planted with traditional wildflowers that are easily established and contains species frequently found in a diverse range of soil types and habitats.

These areas will be planted with:

Bedstraw, Black Medick, Burnet, Buttercup, Campion, Campion, Carrot, Catchfly, Clary, Cowslip, Daisy, Forget-me-not, Foxglove, Goat's-beard, Knapweed Common, Knapweed Greater, Musk Mallow, Self-heal, Sorrel, St John's-wort, Yarrow, Yellow Rattle.

All existing hedgerows will be rejuvenated, where hedgerow is missing or damaged/dead we will be replacing with a mixture of the following: Hawthorn, Blackthorn, Field Maple, Alder, Wild Privet, Wild Cherry, Bird Cherry, Guelder Rose, Spindle, Juneberry.

Hedgerow boarders internal and external will be planted with UK native Cornfield Annuals wildflower containing: Corn Chamomile, Corn Cockle, Cornflower, Marigold Corn, Common Poppy.

All of the above are from the RHS "Perfect For Pollinators" list and are beneficial in creating a long lasting meadow and wildlife habitat.

Where trees are no longer safe and where trees have historically been felled, we will be replanting with: Yew, Apple, Sweet & Horse Chestnut, Walnut, Oak, Ash, Field Maple and Pine.

MAINTENANCE OF PLANTING \

PLANTING ESTABLISHMENT MAINTENANCE.

- All planting of saplings will initially be staked and tied with expandable tie straps.
- saplings to be protected by 'spiral tube' tree guards.
- inspected weekly to check support and protection remains intact, change out any broken or damaged elements.
- ensure ground is hydrated, water where ground observed to be dry.
- remove any excess grass / weed growth from within tube.

ESTABLISHMENT PERIOD (up to 6 months)

- inspect fortnightly to check support and protection remains intact, change out any broken or damaged
- ensure ground is hydrated, water where ground observed to be dry. inspect more frequently in dry periods.
- remove any excess grass / weed growth from within tube.
- replace any saplings that are in poor health or have died away.

MID TERM (after 6 months)

- inspect at least every 4 weeks to check support and protection remains intact, change out any broken or
- ensure ground is hydrated, water where ground observed to be dry. inspect more frequently in dry periods.
- remove any excess grass / weed growth from within tube.
- replace any saplings that are in poor health or have died away.

LONG TERMS (after 18 months)

- inspect to ensure saplings are establish periodically.
- once established remove tube protectors and stakes. continue weekly inspections to detect any damage to saplings.

LIMITATIONS OF USE.

- 1. These drawings are only to be used for the 'drawing type' stated and
- as such are not suitable for any other use. 2. The drawings should **not** be scaled from for obtaining detailed dimensional information unless the dimension is stated on the
- 3. Discrepancies should be reported to **HDP Ltd** immediately.
- agreement is sort from HDP Ltd. 5. The drawings and design are the property of **HDP Ltd.** 6. The drawings are for the sole use of the client. A third party using

4. Drawings and designs should not be reproduced unless strict

- these drawings does so at their own risk. Unless stated otherwise any boundary lines shown are based on
- Ordanance Survey mapping and on site check dimensions. They should not be relied upon for correct boundary demarcation.
